Reflective Spin Case Studies Of Teachers In Higher Education Transforming Action:

Reflective Spin, The: Case Studies Of Teachers In Higher Education Transforming Action Ai Yen Chen, John Van Maanen, 2000-02-01 The new millennium brings with it new challenges and possibilities A globalised world in which education will be the key to cross national relations necessitates a fundamental understanding of the way education is practised in different cultures across the world The Reflective Spin is the first book of its kind about university teachers about professionals sharing their experiences in improving learning and teaching practices The writers of the cases generously share their concerns struggles knowledge and insights as they examine the values assumptions presuppositions and perspectives about learning and teaching in higher education Readers will benefit from this sharing of a new reflective experience in a multi layered multi faceted and multi perspective context International Handbook of Self-Study of Teaching and Teacher Education Practices J. John Loughran, Mary Lynn Hamilton, Vicki Kubler LaBoskey, Tom L. Russell, 2007-07-03 The International Handbook on Self study of Teaching and Teacher Education Practices is of interest to teacher educators teacher researchers and practitioner researchers This volume offers an encyclopaedic review of the field of self study examines in detail self study in a range of teaching and teacher education contexts outlines a full understanding of the nature and development of self study explores the development of a professional knowledge base for teaching through self study purposefully represents self study through research and practice illustrates examples of self study in teaching and teacher education **Enabling Praxis**, 2008-01-01 In a range of professions professional practice today is under threat It is endangered for example by pressures of bureaucratic control commodification marketization and the standardisation of practice in some professions In these times there is a need for deeper understandings of professional practice and how it develops through professional careers Enabling Praxis Challenges for education explores these questions in the context of initial and continuing professional education of teachers It presents a theory of the development of praxis morally committed action oriented by tradition to show the ways praxis is enabled and constrained by the cultural discursive material and social political conditions under which professional practice occurs It introduces the notion of practice architectures to show how particular conditions for practice shape the possibilities of praxis The way these processes work is illustrated by detailed exploration of a number of cases of praxis development in a variety of educational settings at a variety of levels in teacher education for schools and for vocational education and training in the continuing professional education of teachers in educational administration and in informal community based education for sustainability initiatives The book provides conceptual resources that permit deeper analysis of the character conduct and consequences of professional practice It concludes with challenges for education and for initial and continuing teacher education suggesting that the contemporary threats to education as a professional practice call for revitalisation of the profession professional bodies and the intellectual traditions that orient and guide educational practice Developing Cultural Capability in International Higher Education

Sheila Trahar,2010-12-07 By writing as a practitioner researcher who has reflected extensively and critically on her own practice the author here gathers together empirical research case studies and personal reflections beliefs and assumptions into an innovative account of cultural capability *Talking to Learn* Pauline Jones,Jennifer Hammond,2018-10-09 This book examines the place of talk in learning and the role of such talk in literacy education It builds on a strong tradition of research into the role of talk in constructing curriculum knowledge the relationship between talking and thinking and the significance of extended in depth dialogic interaction in classroom talk However it differs from tradition with its emphasis on the need to make the role of language in learning more visible and more explicit This book places particular emphasis on the relationship between dialogic pedagogy and language based approaches to learning Contributions range from discussions on educational linguistics and dialogic pedagogy as complementary perspectives to needs of students for whom English is an additional language or dialect This volume was originally published as a special issue of Research Papers in Education Researching International Pedagogies Meeri Hellstén,Anna Reid,2008-10-13 In our rapidly globalizing world students are able to access learning through mobility through computer mediated experiences and through the diverse perspectives of their peers and teachers All of these components impact on the ways in which universities and their staff prepare and present courses for their students This book presents an edited selection of chapters compiled under the theme of new international pedagogies The objective is to document current pedagogical frameworks and practices in the teaching and learning context of international education It showcases innovative teaching and learning methods methodological frameworks and novel pedagogies that contribute to improving the effectiveness of teaching and learning in international settings and diverse student groups The collection of seventeen chapters offers new debate on applied critical educational thought innovation in teaching and learning and culturally sensitive and inclusive curriculum practices across a broad disciplinary spectrum Of central interest is the production of teaching and learning examples that provide evidence for implementing progress and advancement in the field The book aims to stimulate further debate research and application in the field of international pedagogies Voices of Social Education Bernardo E. Pohl,Cameron White,Christine Beaudry,2021-02-01 There is only one place where social education can occur and flourish through the voices that create a pedagogy of change And it is these voices where the most exciting and provocative moments can occur for those of us who are passionate about education teaching social justice equity and love As such social education is a journey an endeavor that makes us savor the experience of the journey more than the destination And social education is a journey that is enhanced through educator and student voices because it occurs in the most important spaces of our personal and professional lives It occurs in the hallways of the schools we teach in the staff meetings we attend in the mountain villages we venture to visit in the places we work and in the spaces we occupy Moreover social education is a unique kind of journey because it is a human experience that seldom occurs alone It happens with our colleagues and our loved ones It happens with our students administrators and other professionals

who are fighting for the same things that we so fervently believe In the end social education occurs and flourishes in the trenches because it is the active pursuit of getting our hands dirty in our endless pursuit for a better and more just world Social education is also a narrative which takes on a different meaning for each one of us This is because sooner or later each person that embarks into the journey of social education develops its own personal definition of what social education entails through his or her own personal landscape and knowledge This personal landscape has been evolving since we were very young with some of the best examples of human courage and tenacity in the fight for social justice Voices of Social Education A Pedagogy of Change is a collection of personal stories In this volume academics teachers students activists and artists share their personal stories of triumph tribulations and courage in their daily fight for social justice and equality The term social education is not defined as a set number of guidelines or a specific definition we give the term an organic fluency to stress that social education is a point of encounter a common space where we can share with each other our experiences values and culture to form a more genuine and just social experience

Developing Knowledge Communities through Partnerships for Literacy Chestin Auzenne-Curl, Cheryl J. Craig, 2021-09-20 Developing Knowledge Communities through Partnerships for Literacy explores the development of knowledge communities safe spaces on the educational landscape where research and professional development with literacy teachers and writers can unfurl

Space, Curriculum and Learning David Scott, 2006-01-01 In recent years there has been increasing interest in issues of space and spatiality in the social sciences and humanities generally if less so in the study of education This relative lack of interest is surprising given the importance of space and time in the organization of teaching learning and research For instance the timetable and project timeline are central to the organization of learning and knowledge production whether in schools colleges or universities Classrooms workshops and laboratories have different spatial layouts which support certain forms of interaction and communication When we add to this the increasing distances across which knowledge understanding and competence are being distributed through the use of information and communications technologies the fact that issues of space have not been taken up seems more than an oversight This relative lack of interest in space becomes even more surprising when one considers the extensive use of spatial metaphors in the discussion of education and pedagogy For instance the notions of open distance and distributed learning and student centredness border crossing and communities of practice all have a spatial dimension to them Notions of a spiral curriculum act as a spatial imaginary Indeed some metaphors such as flexibility seem to be suggestive of the possibility that all constraints of space and time can be conquered in the provision of learning opportunities throughout life This collection of chapters from researchers around the world attempts to address these issues to examine the significance of space for curriculum learning and identity

The Use of Children's Literature in Teaching Alyson Simpson, 2016-03-22 The Use of Children's Literature in Teaching reveals the impact of politics professional guidelines and restrictive measurements of literacy on the emerging identities of young teachers It places

renewed emphasis on the importance of creative teaching with children's literature for the empowerment of teacher agency to enhance the learning of their students. Framing the debate alongside the issue of teacher autonomy, Simpson describes results from a two-year study which brings together information from interviews, surveys, document analysis, and digital stories from Australia, Canada, the UK, and the US to assess the role of children's literature in pre-service teacher education. Through cross-cultural comparison, this research captures the different levels of connection between politics, education systems, higher education, and pre-service teachers. It exposes how politics' narrow views of professionalism and program structures in teacher education may adversely affect the development of pre-service teachers. This book presents a strong case that reading and responding critically to literary texts leads to better educational outcomes than basic decoding and low-level comprehension training. As such, this book will be of great interest to researchers and scholars working in the areas of teacher education and literacy and primary education. It should also be essential reading for teacher educators and policymakers.

Learning without Burden Mythili Ramchand, Ritesh Khunyakari, Arindam Bose, 2022-07-29 This book looks at education reforms, planning, and policy through an exploration of the Yash Pal Committee report 1993 in India, which made recommendations to improve the quality of learning while reducing cognitive burden on students. It analyses the wide-ranging impact the report had on curriculum, pedagogy, teacher education reforms, and the national policy on education. The book examines the legacy of the report, tracing the various deliberations and critical engagements with issues around literacy, language, and mathematics learning, curriculum reforms, and classroom practices, assessment, and evaluation. It reviews contemporary developments in research on learning in diverse disciplines and languages through the lens of the recommendations made by the Learning without Burden report while engaging with challenges and systemic issues which limit inclusivity and access to quality education. Drawing on extensive research and first-hand academic and teaching experience, this book will attract attention and interest of students and researchers of educational policy and analysis, linguistics, sociology, and South Asian studies. It will also be of interest to policy makers, think tanks, and civil society organisations.

Research Methods for the Self-Study of Practice Deborah Tidwell, Melissa Heston, Linda Fitzgerald, 2009-06-12 This is a book designed with the teacher educator in mind. It provides an in-depth examination of specific methods used effectively in self-study research. The chapters are written by researchers engaged in self-study of their practice.

Edgar H. Schein David Coghlan, 2024-01-30 The contribution of Edgar H. Schein to the field of management organisation studies and applied behavioural science is both extensive and deep. For almost 70 years, he has creatively and systematically shaped theory and practice in areas including organisation development and change, career dynamics, the cultural dynamics of complex systems, leadership, process consultation, and the clinical inquiry research paradigm. He has written extensively on the process of organisational change and framed the construct of the clinical approach to research. With such an extensive corpus over such a long period, Schein has been termed a transcendent thought leader, and it is in this

spirit that a volume exploring his work offers a contribution how scholars and practitioners can come to understand their engagement in organisations This singular volume adopts a reflective perspective on the work of Edgar Schein as a social scientist and shows how he developed his craft as an engaged organisational scholar practitioner through reflexive attention to his experience in working with managers and organisations and generating knowledge out of action The intended contribution is both to present Schein s work to students and scholars of organisation studies and to offer a reflexive methodological framework to engage scholar practitioner in any field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
