Systems Practice: How to Act Ray Ison, 2017-08-10 This book shows how to do systems thinking and translate that thinking into praxis theory informed practical action It will be welcomed by those managing or governing in situations of complexity and uncertainty across all domains of professional and personal life The development of capabilities to think and act systemically is an urgent priority Humans are now a force of nature affecting whole earth dynamics including the earth's climate we live in an Anthropocene or Capitalocene and are confronted by the emergence of a post truth big data world What we have

developed organisationally and institutionally seems very fragile. An imperative exists to recover whatever systemic sensibilities we still retain to foster systems literacy and to invest in systems thinking in practice capability. This will be needed in future at personal, group, community, regional, national and international levels all at the same time. Systems Practice: How to Act is structured into four parts. Part I introduces the societal need to invest in systems thinking in practice in contexts of uncertainty and complexity epitomised by the challenges of responding to human induced climate change. Part II unpacks what is involved in systems practice by means of a juggler isophor examining situations where systems thinking offers useful understanding and opportunities for change. Part III identifies the main factors that constrain the uptake of systems practice and makes the case for innovation in practice by means of systemic inquiry, systemic action research and systemic intervention. The book concludes with Part IV which critically examines how systems practice is or might be utilised at different levels from the personal to the societal.

Advancing Relational Leadership Research Mary Uhl-Bien, Sonia M. Ospina, 2012-10-01. Leaders and followers live in a relational world, a world in which leadership occurs in complex webs of relationships and dynamically changing contexts. Despite this, our theories of leadership are grounded in assumptions of individuality and linear causality. If we are to advance understandings of leadership that have more relevance to the world of practice, we need to embed issues of relationality into leadership studies. This volume addresses this issue by bringing together for the first time a set of prominent scholars from different paradigmatic and disciplinary perspectives to engage in dialogue regarding how to meet the challenges of relationality in leadership research and practice. Included are cutting edge thinking, heated debate and passionate perspectives on the issues at hand. The chapters reveal the varied and nuanced treatments of relationality that come from authors' alternative paradigmatic, entity constructionist, critical views. Dialogue: scholars reacting to the chapters engage in spirited debate regarding the commensurability or incommensurability of the paradigmatic approaches. The editors bring the dialogue together with introductory and concluding chapters that offer a framework for comparing and situating the competing assumptions and perspectives spanning the relational leadership landscape. Using paradigm interplay, they unpack assumptions and lay out a roadmap for relational leadership research. A key takeaway is that advancing relational leadership research requires multiple paradigmatic perspectives and scholars who are conversant in the assumptions brought by these perspectives. The book is aimed at those who feel that much of current leadership thinking is missing the boat in today's complex relational world. It provides an essential resource for all leadership scholars and practitioners curious about the nature of research on leadership, both those with much research exposure and those new to the field.
