Ruth Benedict Beyond Relativity Beyond Pattern:

Ruth Benedict Virginia Heyer Young,2005-01-01 Benedict s work in fact anticipated trends in anthropology in the decades to come by projecting a framework of individuals not only shaped by their culture but also using their culture for personal or collective objectives BOOK JACKET

Constructing Race Tracy Teslow,2014-07-21 This book explores how physical anthropologists struggled to understand variation in bodies and cultures in the twentieth century how they represented race to professional and lay publics and how their efforts contributed to an American formulation of race that has remained rooted in both bodies and cultures as well as heredity and society *Anthropologists and the Rediscovery of America, 1886-1965* John S. Gilkeson,2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold s the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective

The 1904 Anthropology Days and Olympic Games Susan Brownell,2008-12-01 One of the more problematic sport spectacles in American history took place at the 1904 World s Fair in St Louis which included the third modern Olympic Games Associated with the Games was a curious event known as Anthropology Days organized by William J McGee and James Sullivan at that time the leading figures in American anthropology and sports respectively McGee recruited Natives who were participating in the fair s ethnic displays to compete in sports events with the scientific goal of measuring the physical prowess of savages as compared with civilized men This interdisciplinary collection of essays assesses the ideas about race imperialism and Western civilization manifested in the 1904 World s Fair and Olympic Games and shows how they are still relevant A turning point in both the history of the Olympics and the development of modern anthropology these games expressed the conflict between the Old World emphasis on culture and New World emphasis on utilitarianism Marked by Franz Boas s paper at the Scientific Congress the events in St Louis witnessed the beginning of the shift in anthropological research from nineteenth century evolutionary racial models to the cultural relativist paradigm that is now a cornerstone of modern American anthropology Racist pseudoscience nonetheless reappears to this day in the realm of sports

Franz Boas Rosemary Lévy Zumwalt,2019-11-01 Rosemary L vy Zumwalt tells the remarkable story of Franz Boas one of the leading scholars and public intellectuals of the late nineteenth and early twentieth centuries The first book in a two part biography Franz Boas begins with the anthropologist s birth in Minden Germany in 1858 and ends with his

resignation from the American Museum of Natural History in 1906 while also examining his role in training professional anthropologists from his berth at Columbia University in New York City Zumwalt follows the stepping stones that led Boas to his vision of anthropology as a four field discipline a journey demonstrating especially his tenacity to succeed the passions that animated his life and the toll that the professional struggle took on him Zumwalt guides the reader through Boas s childhood and university education describes his joy at finding the great love of his life Marie Krackowizer traces his 1883 trip to Baffin Land and recounts his efforts to find employment in the United States A central interest in the book is Boas s widely influential publications on cultural relativism and issues of race particularly his book *The Mind of Primitive Man* 1911 which reshaped anthropology the social sciences and public debates about the problem of racism in American society Franz Boas presents the remarkable life story of an American intellectual giant as told in his own words through his unpublished letters diaries and field notes Zumwalt weaves together the strands of the personal and the professional to reveal Boas s love for his family and for the discipline of anthropology as he shaped it **The Enigma of Max Gluckman** Robert J.

Gordon,2018-09-01 Introduction the enigma of Max Gluckman Making the very model of a modern liberal London calling How the guinea pig burnt his own bridge Return to Oxford and intellectual ferment Landing and living in Livingi Mary Max and the Mongu masquerade Getting to grips with the Lozi Running the Rhodes Livingstone Institute The seven year plan The African undertow **Maria Czaplicka** Grazyna Kubica,2020-11 This biography of the Polish British anthropologist Maria Czaplicka 1884 1921 is also a cultural study of the dynamics of the anthropological collective presented from a researcher

centric perspective Czaplicka together with Bronis aw Malinowski studied anthropology in London and later at Oxford then she headed the Yenisei Expedition to Siberia 1914 15 and was the first female lecturer of anthropology at Oxford She was an engaged feminist and an expert on political issues in Northern Asia and Eastern Europe But this remarkable woman s career was cut short by suicide Like many women anthropologists of the time Czaplicka journeyed through various academic institutions and her legacy has been dispersed and her field materials lost Gra yna Kubica covers the major events in Czaplicka s life and provides contextual knowledge about the intellectual formation in which Czaplicka grew up including the Warsaw radical intelligentsia and the contemporary anthropology of which she became a part Kubica also presents a critical analysis of Czaplicka s scientific and literary works related to the issues of gender shamanism and race Kubica shows how Czaplicka s sense of agency and subjectivity enriched and shaped the practice of anthropology and sheds light on how scientific knowledge arises and is produced **Hoarding New Guinea** Rainer F. Buschmann,2023-07 Hoarding New

Guinea provides a new cultural history of colonialism that pays close attention to the millions of Indigenous artifacts that serve as witnesses to Europe s colonial past in ethnographic museums Rainer F Buschmann investigates the roughly two hundred thousand artifacts extracted from the colony of German New Guinea from 1870 to 1920 Reversing the typical trajectories that place ethnographic museums at the center of the analysis he concludes that museum interests in material

culture alone cannot account for the large quantities of extracted artifacts Buschmann moves beyond the easy definition of artifacts as trophies of colonial defeat or religious conversion instead employing the term hoarding to describe the irrational amassing of Indigenous artifacts by European colonial residents Buschmann also highlights Indigenous material culture as a bargaining chip for its producers to engage with the imposed colonial regime In addition by centering an area of collection rather than an institution he opens new areas of investigation that include non professional ethnographic collectors and a sustained rather than superficial consideration of Indigenous peoples as producers behind the material culture Hoarding New Guinea answers the call for a more significant historical focus on colonial ethnographic collections in European museums

Homo Imperii Marina Mogilner, 2020-04-01 It is widely assumed that the nonclassical nature of the Russian empire and its equally nonclassical modernity made Russian intellectuals immune to the racial obsessions of Western Europe and the United States *Homo Imperii* corrects this perception by offering the first scholarly history of racial science in prerevolutionary Russia and the early Soviet Union Marina Mogilner places this story in the context of imperial self modernization political and cultural debates of the epoch different reformist and revolutionary trends and the growing challenge of modern nationalism By focusing on the competing centers of race science in different cities and regions of the empire *Homo Imperii* introduces to English language scholars the institutional nexus of racial science in Russia that exhibits the influence of imperial strategic relativism Reminiscent of the work of anthropologists of empire such as Ann Stoler and Benedict Anderson *Homo Imperii* reveals the complex imperial dynamics of Russian physical anthropology and contributes an important comparative perspective from which to understand the emergence of racial science in nineteenth and twentieth century Europe and America

Cora Du Bois Susan C. Seymour, 2015-05-01 Du Bois studied with Franz Boas a founder of American anthropology and with some of his most eminent students Ruth Benedict and Alfred Kroeber During World War II she served as a high ranking officer for the Office of Strategic Services as the only woman to head one of the OSS branches of intelligence Research and Analysis in Southeast Asia After the war she joined the State Department as chief of the Southeast Asia Branch of the Division of Research for the Far East She was also the first female full professor appointed at Harvard University and became president of the American Anthropological Association Du Bois worked to keep her public and private lives separate especially while facing the FBI's harassment as an opponent of U S engagements in Vietnam and as a liberal lesbian during the McCarthy era

Murray, 2005-01-01 This analysis of a troubling chapter in American anthropology reveals what happens when anthropologists fail to make fundamental ethic and political distinctions in their work The authors examine how Taiwanese realities have been represented and misrepresented in American social science literature

Declared Defective Robert Jarvenpa, 2018-05 Declared Defective is the anthropological history of an outcaste community and a critical reevaluation of The Nam Family written in 1912 by Arthur Estabrook and Charles Davenport leaders of the early twentieth century eugenics movement Based on their investigations of an obscure rural enclave in upstate New York the biologists were repulsed by the poverty and behavior of the people in Nam Hollow They claimed that their alleged indolence feeble mindedness licentiousness alcoholism and criminality were biologically inherited Declared Defective reveals that Nam Hollow was actually a community of marginalized mixed race Native Americans the Van Guilders adapting to scarce resources during an era of tumultuous political and economic change Their Mohican ancestors had lost lands and been displaced from the frontiers of colonial expansion in western Massachusetts in the late eighteenth century Estabrook and Davenport s portrait of innate degeneracy was a grotesque mischaracterization based on class prejudice and ignorance of the history and hybridic subculture of the people of Guilder Hollow By bringing historical experience agency and cultural process to the forefront of analysis Declared Defective illuminates the real lives and struggles of the Mohican Van Guilders It also exposes
