SENATE  
S. No. 862

RECEIVED BY: 

Introduced by Senator Ralph G. Recto

**AN ACT  
MANDATING THE ANNUAL PUBLIC DISCLOSURE OF ALL CONTINGENT  
LIABILITIES INCURRED BY ALL NATIONAL GOVERNMENT AGENCIES, LOCAL  
GOVERNMENT UNITS, GOVERNMENT-OWNED OR -CONTROLLED  
CORPORATIONS, GOVERNMENT FINANCIAL INSTITUTIONS, AND OTHER  
GOVERNMENT INSTRUMENTALITIES**

**Explanatory Note**

The Philippine Government is mandated by no less than the 1987 Constitution to recognize the role of the private sector in providing adequate social services, promoting full employment, raising the standard of living, and improving the quality of life for all Filipinos.

Encouraging the private sector to participate in the delivery of public services, however, is hampered by the country's market realities marked by stringent regulations, uncertain socio-economic and political environment, and market distortions caused by price control and subsidies.

To tap private sector capital and skills, the government was compelled to make public sector investments more profitable by providing incentives and assuming investment risks. As such, the conferment of government guarantees on public sector investment and borrowings became one of the prominent features of Republic Act No. 6957 as amended, otherwise known as the Build-Operate-Transfer (BOT) Law.

The benefits of government guarantees, however, come at a price. Studies conducted by the University of the Philippines School of Economics<sup>1</sup> showed that government risk management practices severely understate the level of exposure and risk arising from unfettered provision of guarantees. The Philippine Institute for Development Studies (PIDS)<sup>2</sup> and the Development Budget Coordinating Committee (DBCC)<sup>3</sup> raised their concerns over the unexpected public sector obligations that could be brought about by government guarantees, especially on the delivery of public goods and services.

The Senate Economic Planning Office (SEPO)<sup>4</sup> underscored the importance of effective identification, management, and reporting of contingent liabilities and off-budget risks of government-owned and -controlled corporations (GOCCs), since past fiscal crises in the Philippines were triggered by extra-budgetary activities. Considering the potential of government

Commission,1993      Alternatives for Managing the Nation's Complex Contaminated Groundwater Sites National Research Council,Division on Earth and Life Studies,Water Science and Technology Board,Committee on Future Options for Management in the Nation's Subsurface Remediation Effort,2013-03-27 Across the United States thousands of hazardous waste sites are contaminated with chemicals that prevent the underlying groundwater from meeting drinking water standards These include Superfund sites and other facilities that handle and dispose of hazardous waste active and inactive dry cleaners and leaking underground storage tanks many are at federal facilities such as military installations While many sites have been closed over the past 30 years through cleanup programs run by the U S Department of Defense the U S EPA and other state and federal agencies the remaining caseload is much more difficult to address because the nature of the contamination and subsurface conditions make it difficult to achieve drinking water standards in the affected groundwater Alternatives for Managing the Nation s Complex Contaminated Groundwater Sites estimates that at least 126 000 sites across the U S still have contaminated groundwater and their closure is expected to cost at least 110 billion to 127 billion About 10 percent of these sites are considered complex meaning restoration is unlikely to be achieved in the next 50 to 100 years due to technological limitations At sites where contaminant concentrations have plateaued at levels above cleanup goals despite active efforts the report recommends evaluating whether the sites should transition to long term management

where risks would be monitored and harmful exposures prevented but at reduced costs
