Security Provisioning Managing Access In Extended Enterprises

**Jeanne W. Ross, Peter Weill, David
Robertson**

Security Provisioning Managing Access In Extended Enterprises:

Security Provisioning Yuri Pikover, Jeff Drake, 2002 As enterprises automate more and more of their business processes and integrate those processes to achieve zero latency they may increase their vulnerability to change Preautomated business processes rely on informal circuit breakers to moderate the impact or pace of change across the enterprise If change is not effectively addressed as processes move online or onto the Internet their velocity and scope of effect can disrupt and overwhelm normal processing Fortunately there is a solution This book's purpose is to provide senior corporate management and IT administrators with a clear vision of the advantages criteria and implementation considerations of using policy based provisioning to manage security access rights across the enterprise and beyond Its goal is to provide an overview of the business people and technology factors that comprise the new collaborative realities of the virtualized and extended enterprise to provide an overview of past present and future access needs expectations relevant analyst and business data and to illustrate how provisioning is central for ensuring the integrity of corporate policies individual privacy and overall system security The book will also explore how to make business partners as efficient as internal employees while establishing a successful security infrastructure

Blockchain, Fintech,

and Islamic Finance Hazik Mohamed,Hassnian Ali,2022-09-06 Following the success of the first edition that brought attention to the digital revolution in Islamic financial services comes this revised and updated second edition of Blockchain Fintech and Islamic Finance The authors reiterate the potential of digital disruption to shrink the role and relevance of today's banks while simultaneously creating better faster cheaper services that will be an essential part of everyday life Digital transformation will also offer the ability to create new ways to better comply to Islamic values in order to rebuild trust and confidence in the current financial system In this new edition they explore current concepts of decentralized finance DeFi distributed intelligence stablecoins and the integration of AI blockchain data analytics and IoT devices for a holistic solution to ensure technology adoption in a prudent and sustainable manner The book discusses crucial innovation structural and institutional developments for financial technologies including two fast growing trends that merge and complement each other tokenization where all illiquid assets in the world from private equity to real estate and luxury goods become liquid and can be traded more efficiently and second the rise of a new tokenized economy where inevitably new rules and ways to

enforce them will develop to fully unleash their capabilities These complementary and oft correlated trends will complete the decentralization of finance and will influence the way future financial services will be implemented This book provides insights into the shift in processes as well as the challenges that need to be overcome for practical applications for AI and blockchain and how to approach such innovations It also covers new technological risks that are the consequence of utilizing frontier technologies such as AI blockchain and IoT Industry leaders Islamic finance professionals along with students and academics in the fields of Islamic finance and economics will benefit immensely from this book **Developing and**

Evaluating a Cloud Service Relationship Theory Jan Huntgeburch, 2014-08-21 This book develops evaluates and refines a cloud service relationship theory that explains how cloud users uncertainties arise in these relationships and how they can be mitigated To that end the book employs principal agent theory and the concepts of bounded rationality and social embeddedness Beyond advancing IS research the findings presented can greatly benefit governments IT departments and IT providers helping them to better understand cloud service relationships and to adjust their cloud service strategies accordingly
