**Approach to Pediatric Neurology** Deepak M. Kamat,Lalitha Sivaswamy,2023-01-01 Primary health care providers such as pediatricians and family medicine physicians commonly encounter children with neurologic symptoms such as headache double vision facial weakness etc Most books currently available in the specialty of pediatric neurology are condition or disorder based and most of them are geared towards pediatric neurologists not generalists who take care of children A common thread amongst most currently available books in Pediatric Neurology is that the practitioner already knows what condition or disorder the child is suffering from This book focuses on symptoms to a large extent However children with chronic neurological conditions will follow up with their primary care physicians after their visit with the sub specialists They may have questions or ongoing concerns regarding the diagnosis that has been made or being considered This book attempts to provide information to the primary care physician regarding management and follow up of such children as well This book serves as a guide for busy clinicians who take care of children presenting with neurological symptoms with special emphasis on symptoms that are commonly encountered in clinical practice For each symptom a brief introduction is given as well as a definition and epidemiologic information for the given symptom Readers are also instructed on what historical features and physical examinations are essential in narrowing the differential diagnosis A recommendation on the management of the condition is then established Instructions on when one should refer the patient to subspecialists for further evaluation and management are clearly laid out Finally a list of appropriate resources is provided for families as well as clinical pearls that

can be quickly scanned when one is pressed for time The overarching goal of this book is to enable the primary care physician to make a confident diagnosis triage efficiently and initiate treatment if need be Written by experts in the field Symptom Based Approach to Pediatric Neurology is a valuable resource for evaluation and management of children presenting with neurologic symptoms for primary care providers who take care of children *Deep Learning for Neurological Disorders in Children* Saman Sargolzaei, Ali Fatemi, Fahimeh Mamashli, Anna Farzindar, Yalda Mohsenzadeh, Arman Sargolzaei, 2022-12-02 *Manual of Pediatric Intensive Care* Haresh Kirpalani, 2009 The Manual of Pediatric Intensive Care distills the salient information required to provide state of the art care for the acutely ill and injured child into a concise readily useful guide Providing timely and appropriate care is a daunting challenge for fontline caregivers early response and transport teams and pediatric and critical care trainees This manual delivers the basic information and practical advice needed by those who provide urgently needed care to children in a format that occupies the middle ground between the voluminous highly detailed textbook and the to do lists that provide no physiological background for the approach presented An introduction for beginners and a valuable aid for those already engaged in the care of acutely ill children the Manual of Pediatric Intensive Care comprises contributions from specialists from around the world including doctors nurses pharmacists and respiratory therapists **Brain Seizure Detection and Classification Using EEG Signals** Varsha K. Harpale, Vinayak Bairagi, 2021-09-09 Brain Seizure Detection and Classification Using Electroencephalographic Signals presents EEG signal processing and analysis with high performance feature extraction The book covers the feature selection method based on One way ANOVA along with high performance machine learning classifiers for the classification of EEG signals in normal and epileptic EEG signals In addition the authors also present new methods of feature extraction including Singular Spectrum Empirical Wavelet Transform SSEWT for improved classification of seizures in significant seizure types specifically epileptic and Non Epileptic Seizures NES The performance of the system is compared with existing methods of feature extraction using Wavelet Transform WT and Empirical Wavelet Transform EWT The book s objective is to analyze the EEG signals to observe abnormalities of brain activities called epileptic seizure Seizure is a neurological disorder in which too many neurons are excited at the same time and are triggered by brain injury or by chemical imbalance Presents EEG signal processing and analysis concepts with high performance feature extraction Discusses recent trends in seizure detection prediction and classification methodologies Helps classify epileptic and non epileptic seizures where misdiagnosis may lead to the unnecessary use of antiepileptic medication Provides new guidance and technical discussions on feature extraction methods and feature selection methods based on One way ANOVA along with high performance machine learning classifiers for classification of EEG signals in normal and epileptic EEG signals and new methods of feature extraction developed by the authors including Singular Spectrum Empirical Wavelet *Advances in Epilepsy Research and Treatment: 2012 Edition* , 2012-12-26 Advances in Epilepsy Research and Treatment 2012 Edition is a
