Selected Intellectual Property and Unfair Competition Roger E. Schechter, 1991 **Selected Intellectual Property and Unfair Competition Statutes, Regulations, and Treaties**, 2008 International Intellectual Property Law and Human Security Robin Ramcharan, 2012-11-27 This book examines how intellectual property rights IPR affect the daily lives of individuals worldwide and how that may in turn impact the health and wealth of nations While the protection of the intellectual endeavours of authors and inventors is vital for a fair and just society it is important that the IPR regime remains flexible enough to encourage creativity innovation and the free flow of information and technology that are critical to the well being of billions of people especially in the developing world This work examines the implications of the IPR regime for basic human security It examines the relationship between IPR regime and fundamental human rights such as the right to education health and food and the broader right to development This book will be of interest to IP scholars international relations specialists and international security analysts in particular those interested in non traditional security issues It may also serve as resource book for the international business community on developmental and human rights aspects of IP

Rethinking Intellectual Property Gustavo Ghidini, 2018 Intellectual property law is built on constitutional foundations and is underpinned by the twin freedoms of freedom of expression and freedom of economic enterprise In this thoughtful evaluation Gustavo Ghidini offers up a reconstruction of the core features of each intellectual property paradigm including patents copyright and trademarks suggesting measures for reform to allow intellectual property to become socially beneficial for all **Innovation, Competition and Consumer Welfare in Intellectual Property Law** Gustavo Ghidini, 2010-01-01 Professor Ghidini has long since made himself a worldwide reputation as a leading scholar He is a profound critic of intellectual property protection that follows rigid property logic and favours the functionalist competition innovation logic Innovation Competition and Consumer Welfare in Intellectual Property Law is truly enriching reading Hanns Ullrich College of Europe Bruges Belgium We in the United States have much to learn not only from Gustavo Ghidini's careful analysis of modern trends in the European IP regime but also from his thoughtful development of the thesis that free competition should be understood as the overarching principle guiding both IP protection and what we call antitrust law Rudolph J R Peritz New York Law School US and author of Competition Policy in America This authoritative book provides a comprehensive critical overview of the basic IP paradigms such as patents trademarks and copyrights Their intersection with competition law and their impacts on the exercise of social welfare are analysed from an evolutionary perspective The analyses and proposals presented encompass the features and rationales of a legal field in constant evolution and relate them to increasingly rapid technological economic social and geo political developments Gustavo Ghidini highlights the emerging trends that challenge the traditional all exclusionary vision of IP law and its application The author expertly combines holistic evolutionary and constitutionally oriented approaches with the search for a rebalancing of the IP rights holders positions with citizens and

users rights This book will appeal to academics scholars and lawyers specializing in the realm of intellectual property competition and comparative law

Ownership of Knowledge Dagmar Schafer, Annapurna Mamidipudi, Marius Buning, 2023-07-18 A framework for knowledge ownership that challenges the mechanisms of inequality in modern society Scholars of science technology medicine and law have all tended to emphasize knowledge as the sum of human understanding and its ownership as possession by law Breaking with traditional discourse on knowledge property as something that concerns mainly words and intellectual history or science and law Dagmar Sch fer Annapurna Mamidipudi and Marius Buning propose technology as a central heuristic for studying the many implications of knowledge ownership Toward this end they focus on the notions of knowledge and ownership in courtrooms workshops policy and research practices while also shedding light on scholarship itself as a powerful tool for making explicit the politics inherent in knowledge practices and social order The book presents case studies showing how diverse knowledge economies are created and how inequalities arise from them Unlike scholars who have fragmented this discourse across the disciplines of anthropology sociology and history the editors highlight recent developments in the emerging field of the global history of knowledge as science as economy and as culture The case studies reveal how notions of knowing and owning emerge because they reciprocally produce and determine each other s limits and possibilities that is how we know inevitably affects how we can own what we know and how we own always impacts how and what we are able to know Contributors Dagmar Sch fer Annapurna Mamidipudi Cynthia Brokaw Marius Buning Viren Murthy Marjolijn Bol Amy E Slaton James Leach Myles W Jackson Lissant Bolton Vivek S Oak J rn Oeder

Selected Intellectual Property and Unfair Competition Roger E. Schechter, 2010 The new edition of this one volume compilation of statutes for law students has been updated to include the most significant developments of the past year Three of the new acts that are incorporated in the 2010 edition are the Biological Price Competition and Innovation Act of 2009 the Trademark Technical and Conforming Amendment Act of 2010 and the Webcaster Settlement Act of 2009

The AALS Directory of Law Teachers, 2001 *Research Handbook on Intellectual Property and Competition Law* Josef Drexler, 2010-01-01 The volume offers an outstanding collection of studies on the interaction of IP and competition policy and is highly recommended for academics graduate students and practitioners with an interest in more theoretical studies Ioannis Lianos World Competition Each chapter in the Research Handbook on Intellectual Property and Competition Law is written so lucidly that it will be of great interest to law professors and post graduate students of intellectual property and competition law as well as those interested in innovation and competition theory and legal practices in intellectual property and competition law Madhu Sahni Journal of Intellectual Property Rights This is a book that delivers on its promise With a strong cast of contributors from a variety of countries economies and disciplines it makes the reader wonder how any commercially attractive IP ever gets exploited at all IPKAT Here it comes the book that I have been waiting for This will surely be an inspiring source of knowledge in my Masters Programme in European

Intellectual Property Law at Stockholm University While promoting intellectual property protection as an important means for innovations and cultural developments a critical analysis and a flexible approach to the needs for free creative space and effective competition is crucial As this book so well illustrates this delicate balance is no either or Marianne Levin Stockholm University Sweden This comprehensive Handbook brings together contributions from American Canadian European and Japanese writers to better explore the interface between competition and intellectual property law Issues range from the fundamental to the specific each considered from the angle of cartels dominant positions and mergers Topics covered include among others technology licensing the doctrine of exhaustion network industries innovation patents and copyright Appropriate space is devoted to the latest developments in European and American antitrust law such as the more economic approach and the question of anti competitive abuses of intellectual property rights Each original chapter reflects extensive comments by all other contributors an approach which ensures a diversity of perspectives within a systematic framework These cutting edge articles will be of great interest to law professors and postgraduate students of intellectual property and competition law as well as those interested in innovation and competition theory and legal practices in intellectual property and competition law

Blackstone's Statutes on Intellectual Property Andrew Christie, Stephen Gare, 2016 This volume gives coverage of UK and international intellectual property law containing all the up to date legislation relevant to undergraduate law degrees

Intellectual Property and Competition Law Gustavo Ghidini, 2006-01-01 The book ends with a comprehensive selection of the relevant bibliography This part is all the more valuable to the reader as Ghidini does not simply list the relevant literature but puts it in its general context and comments on it Ghidini's book is a fascinating trip through the system of IP laws Beatriz Conde Gallego Intellectual Property and Competition Law Intellectual Property and Competition Law by Gustavo Ghidini provides a persuasively presented descriptive analysis of a distinctively European perspective on intellectual property law and its relationship to competition law Professor Ghidini expertly presents the evolution of intellectual property laws and its contemporary manifestations with respect to the expansion copyright law in technological fields and the inevitable conflict with patent law the attempt at creating monopolies such as in biotechnology and so much more A seminal work of impressive and articulate scholarship Intellectual Property and Competition Law should be considered mandatory reading for students and researchers in the field of intellectual property rights and a very strongly recommended addition to academic library International Economics and Judicial Studies reference collections The Economics Shelf Midwest Book Review the provocative nature of this book is one of its great strengths as are its cohesiveness and erudition Mel Marquis European Competition Law Review We in the United States have much to learn not only from Gustavo Ghidini's careful analysis of modern trends in the European IP regime but also from his thoughtful development of the thesis that free competition should be understood as the overarching principle guiding both IP protection and what we call antitrust law Rudolph J R Peritz New York Law School author of Competition Policy in America and American Antitrust Institute US

This rich and challenging book offers a critical appraisal of the relationship between intellectual property law and competition law from a particularly European perspective. Gustavo Ghidini highlights the deficiencies in studying each of these areas of law independently and argues for a more holistic approach, insisting that it is more useful and indeed essential to consider them as interdependent. He does this first by examining how competition and intellectual property IP converge, diverge and inform one another. Secondly, he assesses how IP law can be interpreted through the guiding principles of competition law, antitrust and unfair competition, and within the overarching principle of free competition. The book traces the evolution of modern IP law, which it claims is marked heavily both by over-protectionist trends such as the extension of copyright law to technological fields where it trespasses on the territory of patent law, and by attempts to monopolize the achievements of basic research such as in the example of biotechnology. Through an examination of such emerging issues as access to standards of information and patenting of genetic materials, the author makes a clear case for a reading of IP law that promotes dynamic processes of innovation by competition and competition by innovation, with related benefits to consumer welfare such as wider choices, greater access to culture and information, and lower prices. Advanced students and researchers in all areas of intellectual property will find this book a stimulating alternative to traditional interpretations of the subject.

The Internationalisation of Competition Rules Brendan J. Sweeney, 2009-09-10 The widespread move towards more market-driven models of political economy combined with the expanding internationalisation of business and commerce has led to a series of proposals for global competition rules. To date, these proposals have been hotly contested. The purpose of this book is to investigate in some depth whether there is a rational foundation for pursuing international competition rules and what form these laws should take. The book takes examples from existing competition laws around the world, in particular the US and the EU, both of which have a long history of enforcing established competition rules.
