Journey Khoon Yoong Wong, Peng Yee Lee, Berinderjeet Kaur, Pui Yee Foong, Swee Fong Ng, 2009-02-19 This comprehensive book is a state of the art review of research and practices of mathematics education in Singapore It traces the fascinating journey from the original development of the Singapore mathematics curriculum in the 1950s to the present day and reports on diverse findings about the Singapore experience that are not readily available in print All of the authors are active mathematics educators or senior mathematics teachers in Singapore thus adding authenticity and distinctiveness to the stories covered in this book The issues they so earnestly explore in this book will undoubtedly be of interest to graduate students mathematics educators and the international mathematics education community Early Algebraization Jinfa

Cai, Eric Knuth, 2011-02-24 In this volume the authors address the development of students algebraic thinking in the elementary and middle school grades from curricular cognitive and instructional perspectives The volume is also international in nature thus promoting a global dialogue on the topic of early Algebraization *Early Algebra* Carolyn

Kieran, JeongSuk Pang, Deborah Schifter, Swee Fong Ng, 2016-07-11 This survey of the state of the art on research in early algebra traces the evolution of a relatively new field of research and teaching practice With its focus on the younger student aged from about 6 years up to 12 years this volume reveals the nature of the research that has been carried out in early algebra and how it has shaped the growth of the field The survey in presenting examples drawn from the steadily growing research base highlights both the nature of algebraic thinking and the ways in which this thinking is being developed in the primary and early middle school student Mathematical relations patterns and arithmetical structures lie at the heart of early algebraic activity with processes such as noticing conjecturing generalizing representing justifying and communicating being central to students engagement The American Bookseller , 1890 **Effective Mathematics Lessons Through An**

Eclectic Singapore Approach: Yearbook 2015, Association Of Mathematics Educators Khoon Yoong Wong, 2015-05-21 With this seventh volume as part of the series of yearbooks by the Association of Mathematics Educators in Singapore we aim to provide a range of learning experiences and teaching strategies that mathematics teachers can judiciously select and adapt in order to deliver effective lessons to their students at the primary to secondary level Our ultimate goal is to develop successful problem solvers who are able to understand concepts master fundamental skills reason logically apply mathematics enjoy learning and strategise their thinking These qualities will prepare students for life long learning and careers in the 21st century The materials covered are derived from psychological theories education praxis research findings and mathematics discourse mediated by the author s professional experiences in mathematics education in four countries

over the past four decades They are organised into ten chapters aligned with the Singapore mathematics curriculum framework to help teachers and educators from Singapore and other countries deepen their understanding about the so called Singapore Maths The book strikes a balance between mathematical rigour and pedagogical diversity without rigid adherence to either This is relevant to the current discussion about the relative roles of mathematics content knowledge and pedagogical content knowledge in effective teaching It also encourages teachers to develop their own philosophy and teaching styles so that their lessons are effective efficient and enjoyable to teach Computer Algebra J.
