Menéndez Alarcón, Stefan Immerfall, 2006-01-01 This volume is concerned with the current state of affairs of the German American relationship the causes and sources of existing discontent and opportunities for safeguarding the future of transatlantic relations The chapters analyze domestic and foreign policies political cultures and compare trends in business relations migration culture education journalism law and religion The book promotes a new understanding and valuation of commonalities and differences of basic values national interests and societal priorities in both nations *The Democratic System in the Eastern Caribbean* Donald C. Peters, 1992-06-30 What are the unique features of the governing structures and political systems of the small states and former British colonies of the East Caribbean Are they truly democratic Do the decision makers manipulate their peoples And what can we learn about the political modernization of developing countries through an in depth study of the governing of Antigua Dominica Grenada St Lucia St Vincent and the Grenadines St Kitts Nevis and Montserrat This is the most comprehensive analysis to date of these little known democracies one that will interest students in comparative government and Latin American studies This study provides a conceptual framework for comparing East Caribbean governments with other Western political systems for assessing the democratic and authoritarian characteristics of seven small states and for analyzing the impact of modernization on the political development of these developing nations The study describes the political institutions in the East Caribbean the role of political parties the church and class and shows how the particular social and economic problems affect the governments and people in the region **Principled Diplomacy** Cathal J. Nolan, 1993-01-30 This new analysis of governing ideas in U S foreign policy shows how they arise are sustained and challenged both domestically and internationally and become part of the world order Nolan assesses the problems of reconciling concerns for individual rights and liberal principles with national security interests in U S foreign policy over the course of the twentieth century This interpretive survey redefines the key components in the make up of U S diplomacy and provides good reading for students of American government international relations and U S foreign policy American and world history defense and human rights policy This short history traces the notions that liberty is indivisible and that security depends ultimately on the establishment and success of liberal democratic norms between and within states It shows how U S policy vacillates between giving active or passive expression to these ideas always relying on a basic assumption about the presumed pacific character of democracy Utilizing a wide variety of primary and secondary sources it looks at how these ideas became manifest in two major policy settings those affecting the Soviet Union and the UN Through these case studies the book shows how these ideas become progressively embedded in U S policy how they have been challenged by different interests and events how they were disseminated among and accepted by allies and even several former adversaries and how as a result they now permeate the structures of major international organizations and even

underlie the emerging post Cold War international system as a whole The conclusion offers an interesting perspective for the future

studies of importance *United States Electoral Systems* Wilma Rule, Joseph F. Zimmerman, 1992-06-23 This is the only full length study to examine how different electoral systems impact the election of women and minorities to public office in the United States Rule and Zimmerman have brought together leading scholars to show how different systems affect local state and national elections Important demographic changes new opportunities and formidable problems are underscored in analyses of the effects of among many other things cumulative voting judicial election systems multimember and single member districts and reapportionment This study is unusual in combining an overall analysis of electoral systems and case material with proposals for making government more representative inclusive and responsive Criteria are provided for evaluating the equity of electoral systems The election of women and minorities to Congress is reviewed carefully and options for increasing this direct representation of minorities and women are considered Case studies describe legislative elections in several states In depth studies deal with local elections cumulative and limited voting systems alternative judicial electoral systems and proportional representation Academics and professionals who study political parties and electoral systems minority politics and women s studies will find this work to be especially intriguing and important *The Third World and South Africa* Richard Payne, 1992-08-24 Converging revolutionary changes in Europe the former Soviet Union and in southern Africa radically transformed the international political environment in which Third World countries had formulated and implemented their policies toward South Africa These changes also focused attention on the need for democratic reforms in Sub Saharan Africa and elsewhere in the Third World By removing apartheid s legal underpinning the South African government made a major and largely unanticipated step toward creating a relatively egalitarian and nonracial society Dismantling the more intractable social and economic components of a legal system of racial domination into which South Africans have been socialized is clearly a more herculean endeavor Payne analyzes Third World relations with South Africa the common and divergent interests among the countries that opposed apartheid conflict and cooperation between the Third World and South Africa and the implications of changes in South Africa for the Third World in general and Sub Saharan Africa in particular He brings into sharper focus contradictions between the declaratory policies against apartheid expressed by Third World states and their actual practices Payne examines how national interests leaders personalities policymaking processes and problems within specific countries influence Third World foreign policies in general and toward South Africa specifically As such the work will be invaluable to students and scholars involved with African studies Third World politics and international relations *Moving the Earth* Uday Desai, 1993 This empirical study provides an introduction to the dynamics of regulatory federalism and is the first book to focus on the major surface mining regulations A broad spectrum of contributors most with first hand experience describe the forces that have shaped the implementation of the Surface Mining Control and Reclamation Act since 1972 They offer varying perspectives for understanding interest group conflicts technological and market considerations intergovernmental procedures and problems They describe the forces shaping the
