The Christian College (RenewedMinds) William C. Ringenberg, 2006-04-01 When it first appeared in 1984 The Christian College was the first modern comprehensive history of Protestant higher education in America Now this second edition updates the history featuring a new chapter on the developments of the past two decades a major introduction by Mark Noll a new preface and epilogue and a series of instructive appendixes Fundamentalist U Adam Laats, 2018-02-01 Colleges universities and seminaries do more than just transfer knowledge to students They sell themselves as experiences that transform young people in unique ways The conservative evangelical Protestant network of higher education has been no different In the twentieth century when higher education sometimes seemed to focus on sports science and social excess conservative evangelical schools offered a compelling alternative On their campuses evangelicals debated what it meant to be a creationist a Christian a proper American all within the bounds of Biblical revelation Instead of encouraging greater personal freedom and deeper pluralist values conservative evangelical schools thrived by imposing stricter rules on their students and faculty In Fundamentalist U Adam Laats shows that these colleges have always been more than just schools they have been vital intellectual citadels in America's culture wars. These unique institutions have defined what it has meant to be an evangelical and have reshaped the landscape of American higher education Students at these schools have been expected to learn what it means to be an educated evangelical in a secularizing society. This book asks new questions about that formative process How have conservative evangelicals hoped to use higher education to instill a uniquely evangelical identity How has this identity supported the continuing influence of a dissenting body of knowledge In what ways has it been tied to cultural notions of proper race relations and proper relations between the sexes And perhaps most important how have students responded to schools attempts to cultivate these vital notions about their selves In order to understand either American higher education or American evangelicalism we need to appreciate the role of this influential network of dissenting institutions Only by making sense of these schools can we make sense of America's continuing culture wars

The Oxford Handbook of Christian Fundamentalism Andrew Atherstone, David Ceri Jones, 2024-01-18 This authoritative volume offers the fullest account to date of Christian fundamentalism its origins in the nineteenth century and its development up to the present day It looks at the movement in global terms and through a number of key subjects and debates in which it is actively engaged **Encyclopedia of Christian Education** George Thomas Kurian, Mark A.

crane Rather then succumbing to doomsayers leaders in Christian higher education bonded together around the commanding truth that all things come together in Jesus Christ They drove their stake for the future in the integration of faith and learning as the reason for the existence of Christ centered higher education Out of this commitment came a renaissance movement of common cause and unprecedented cooperation through the Consortium of Christian Colleges and the Council for Christian Colleges Universities Will integration continue to be the energizing and all pervasive influence that gives the Christ centered institution its reason for existence Trustees presidents deans and faculties in each generation must think and rethink the concept in the light of theological academic technological and cultural change David McKenna opens the conversation by remembering where we were confirming who we are and envisioning what we can be Samuel Schuman, 2010-01-18 Samuel Schuman examines the place of religious colleges and universities particularly evangelical Protestant institutions in contemporary American higher education Many faith based schools are flourishing They have rigorous academic standards impressive student recruitment ambitious philanthropic goals and well maintained campuses and facilities Yet much of the U S higher education community ignores them or accords them little respect Seeing the Light considers instead what can be learned from the viability of these institutions The book begins with a history of post secondary U S education from the perspective of the religious traditions from which it arose After focusing briefly on nonevangelical institutions Schuman next looks at three Roman Catholic institutions the College of New Rochelle Villanova University and Thomas Aguinas College He then profiles evangelical colleges and universities in detail discovering the factors contributing to their success These institutions range from nationally recognized to little known from rich to poor with both highly selective and open admission requirements Interviews with key administrators faculty and students reveal the challenges the successes and the goals of these institutions Schuman concludes that these schools Baylor University Anderson University New Saint Andrews College Calvin College North Park University George Fox University Westmont College Oral Roberts University Northwestern College and Wheaton College and others like them offer important and timely lessons for the broader higher education community Change and Continuity in American Colleges and Universities Nathan, M. Women in Academic Leadership Susan J. Bracken, Jeanie K. Allen, Diane R. Dean, 2023-07-03 Colleges and universities benefit from diversity in their leadership roles and profess to value diversity of thought of experience of person Yet why do women remain under represented in top academic leadership positions and in key positions along the academic career ladder Why don't they advance at a rate proportional to that of their male peers How do internal and external environmental contexts still influence who enters academic leadership and who survives and thrives in those roles Women in Academic Leadership complements its companion volumes in the Women in Academe series provoking readers to think critically about the gendered nature of academic leadership across the spectrum of institutional types It argues that leadership the academy and the nexus of academic leadership remain gendered structures steeped in male oriented norms and mores Blending

research and reflection it explores the barriers and dilemmas that these structures present and the professional strategies and the personal choices women make in order to successfully surmount them The authors pose questions about how women leaders negotiate between their public and private selves They consider how women develop a vital sense of self efficacy along with the essential skills and knowledge they need in order to lead effectively how they cultivate opportunity and how they gain legitimacy and maintain authenticity in a male gendered arena For those who seek to create an institutional environment conducive to equity and opportunity this book offers insight into the pervasive barriers facing women of all colors and evidence of the need for a more complex multi dimensional view of leadership For women in academe who seek to reach their professional potential and maintain authenticity it offers encouragement and a myriad of strategies for their growth and development Piety and Plurality Glenn Thomas Miller, 2014-06-09 I began studying American theological education in the 1970s and Piety and Plurality is the third of three studies In Piety and Intellect I examined the colonial and nineteenth century search for a form of theological education that was true to the church's confessional traditions and responsible to the intellectual demands of the age In Piety and Profession I described how that model was modified under the impact of the new biblical criticism and by the American belief in professionalism In this volume I have tried to bring the story up to date Unfortunately I did not find one unifying theme for the period Rather theological education seemed to move forward on a number of different levels each with its own story Here I have tried to capture some of the dynamics of this movement and to indicate how theological educators have struggled with the plurality in their midst In the process theological education has learned to live with its contradictions and problems As important as the stories are however there is also the story of the schools struggles to live in the midst of a constant financial crisis that checked development at every Private Higher Education Alma Maldonado-Maldonado, Yingxia Cao, Hong Zhu, Daniel C.
