Sharer, 2009-04-22 This brief inexpensive introduction to the techniques methods and theoretical frameworks of contemporary archaeology follows the same organizing principle as the text *Archaeology Discovering Our Past* but features less detail Archaeological methods and theory are covered comprehensively at a reasonable level of detail in under 300 pages Illustrative examples and case studies present a temporal and geographic balance of both Old and New World sites Abundant student aids include maps of archaeological areas extensive illustrations chapter introductions and summaries a guide to further reading at the end of each chapter a glossary a bibliography and an index *Prehistory* Chris Gosden, 2018-06-21

Prehistory covers the period of some 4 million years before the start of written history when our earliest ancestors the Australopithecines existed in Africa But this is relatively recent compared to whole history of the earth of some 4.5 billion years A key aspect of prehistory is that it provides a sense of scale throwing recent ways of life into perspective Humans and their ancestors lived in many different ways and the cultural variety we see now is just a tiny fraction of that which has existed over millions of years Humans are part of the broader evolution of landscapes and communities of plants and animals but *Homo sapiens* is also the only species to have made a real impact on planetary systems To understand such an impact we need a grasp of our longest term development and ways of life In this new edition of his *Very Short Introduction* Chris Gosden invites us to think seriously about who we are by considering who we have been As he explains many new discoveries have been made in archaeology over the last ten years and a new framework for prehistory is emerging A greater understanding of Chinese and central Asian prehistory has thrown Eurasian prehistory in quite a different light with flows of the influence of culture over large areas now evident This has eaten away at the traditional view of human progress around the invention of agriculture the development of cities and much later the industrial revolution and given us new geographies to think about Chris Gosden explores the new landscape of our prehistory and considers the way the different geographical locations weave together ABOUT THE SERIES The *Very Short Introductions* series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable *Handbook of Archaeological Theories* R. Defining and Measuring Diversity in Archaeology Metin I. Eren, Briggs Buchanan, 2022-07-18 Calculating the diversity of biological or cultural classes is a fundamental way of describing analyzing and understanding the world around us Understanding archaeological diversity is key to understanding human culture in the past Archaeologists have long experienced a tenuous relationship with statistics however the regular integration of diversity measures and concepts into archaeological practice is becoming increasingly important This volume includes chapters that cover a wide range of archaeological applications of diversity measures Featuring studies of archaeological diversity ranging from the data driven to the theoretical from the Paleolithic to the Historic periods authors illustrate the range of data sets to which diversity measures can be applied as well as offer new methods to examine archaeological diversity **Understanding the Archaeological Record** Gavin Lucas, 2012-02-06 This book explores the diverse understandings of the archaeological record in both historical and contemporary perspective while also serving as a guide to reassessing current views Gavin Lucas argues that archaeological theory has become both too fragmented and disconnected from the particular nature of archaeological evidence The book examines three ways of understanding the archaeological record as historical sources through formation theory and as material culture then reveals ways to connect these three domains through a reconsideration of archaeological entities and archaeological practice Ultimately Lucas calls for a rethinking of the nature of the archaeological record and the kind of history and narratives written from it **Global Archaeological Theory** Pedro Paulo Funari, Andrés Zarankin, Emily Stovel, 2006-04-07 Archaeological theory has gone through a great upheaval in the last 50 years from the processual theory which wanted to make archaeology more scientific to post processual theory which understands that interpreting human behavior even of past cultures is a subjective study This subjective approach incorporates a plurality of readings thereby implying that different interpretations are always possible allowing us to modify and change our ideas under the light of new information and or interpretive frameworks In this way interpretations form a continuous flow of transformation and change and thus archaeologists do not uncover a real past but rather construct a historical past or a narrative of the past Post processual theory also incorporates a conscious and explicit political interest on the past of the scholar and the subject This includes fields and topics such as gender issues ethnicity class landscapes and consumption This reflects a conscious attempt to also decentralize the discipline from an imperialist point of view to an empowering one Method and theory also means being politically aware and engaged to incorporate diverse critical approaches to improve understanding of the past and the present This book focuses on the fundamental theoretical issues found in the discipline and thus both engages and represents the very rich plurality of the post processual approach to archaeology The book is divided into four sections Issues in Archaeological Theory Archaeological Theory and Method in Action Space and Power in Material Culture and Images as Material Discourse *Texts, Rocks, and Talk* John R. Lanci, 2002 In *Texts Rocks and Talk* biblical scholar and teacher John Lanci suggests that many have lost the ability to focus on the

essentials to experience a Jesus Christ alive and powerful in our midst He responds by inviting readers on a journey back to the Bible Lanci conveys the experience of interpreting the Bible inviting readers to witness the interpretation of one particular passage from the Hebrew Bible and one from the New Testament from start to finish Along the way he covers some of the same ground that biblical introductions present as he explains what interpreters do and why they do it Readers will gain a deeper understanding of the need to interpret texts and greater confidence in their ability to enter into the conversation that sacred texts provide They will also have a greater confidence in the possibility that their Christian community can open itself up to that divine conversation Texts Rocks and Talk can serve as an introduction to the Bible textbook for college undergraduates parish discussion groups or individuals who do not have a lot of theological background but are interested in finding their way into the Bible The chapters are relatively short and clearly written with questions for reflection and discussion Chapters in Preliminaries are Why Take It on the Road What the Bible Is Not and A Preview of Coming Attractions What the Bible Is Chapters in The Song of Songs are Sex on the Page Healthy Suspicion A Walking Staff for Our Journey What is the Book of the Dead and the Rocks Lifestyles of the Dead and Buried What Archaeology Is and What It Is Not Making the Heart Forget The Love Songs of Ancient Egypt and The Egyptian Love Songs and the Song of Songs The chapter in An Interlude is An Interlude with Jesus and Christ Chapters in First Corinthians are Our Brother Paul We Raise an Eyebrow in Surprise Paul the Corinthians and a Letter The Rhetoric of a Text What Kind of Fool Is God A Little History a Little Wisdom a Little Mystery The Rigamortale of Roman Power and Corinthian Rocks The No Relax Tour Continues into Darker Realms and The Great Reversal Chapters in Talk Counterimagining the World are Three Umbrellas and a Sea Change Counterimagining the World We Confront the Passion of God In Praise of Christian Flesh and The Journey Not the Arrival Matters Includes an Introduction Epilogue and Notes Citations Suggestions for Further Readings **The Oxford**
