The Journals of Captain James Cook on his Voyages of Discovery J.C. Beaglehole, 2017-07-05 Captain James Cook's first two voyages of exploration in 1768-71 and 1772-75 had drawn the modern map of the South Pacific Ocean and had opened the door on the discovery of Antarctica These expeditions were the subject of Volumes I and II of this edition of Cook's Journals The third voyage on which Cook sailed in 1776 was directed to the Northern Hemisphere Sailing north from Tahiti in 1778 Cook made the first recorded discovery of the Hawaiian Islands On March 7 he sighted the Oregon coast in 44°N The remarkable voyage which he made northward along the Canadian and Alaskan coasts and through Bering Strait to his farthest north in 70°N nearly disproved the existence of a navigable passage towards the Atlantic and produced charts of impressive accuracy Returning to Hawaii to refit Cook met his death in a clash with the natives as tragic as it seems unnecessary The volume and vitality of the records both textual and graphic for this voyage surpass those even for Cook's second voyage Dr Beaglehole prints the full text of Cook's own holograph journals followed by those of Captains Clerke and King for the course of the voyage after Cook's death This is a facsimile reprint of the edition published in 1967 For the print on demand edition the illustrations originally in colour are reproduced in black and white the fold outs divided to fit on separate pages and the volume itself split into two parts *Mapping and Empire* Dennis Reinhartz, Gerald D.

Saxon, 2005-10-01 From the sixteenth through the mid nineteenth centuries Spain then Mexico and finally the United States took ownership of the land from the Gulf Coast of Texas and Mexico to the Pacific Coast of Alta and Baja California today's American Southwest Each country faced the challenge of holding on to territory that was poorly known and sparsely settled and each responded by sending out military mapping expeditions to set boundaries and chart topographical features All three countries recognized that turning terra incognita into clearly delineated political units was a key step in empire building as

vital to their national interest as the activities of the missionaries civilian officials settlers and adventurers who followed in the footsteps of the soldier engineers With essays by eight leading historians this book offers the most current and comprehensive overview of the processes by which Spanish Mexican and U S soldier engineers mapped the southwestern frontier as well as the local and even geopolitical consequences of their mapping Three essays focus on Spanish efforts to map the Gulf and Pacific Coasts to chart the inland Southwest and to define and defend its boundaries against English French Russian and American incursions Subsequent essays investigate the role that mapping played both in Mexico s attempts to maintain control of its northern territory and in the United States push to expand its political boundary to the Pacific Ocean The concluding essay draws connections between mapping in the Southwest and the geopolitical history of the Americas and Europe
