Masterpieces Of Chicago Architecture:

Masterpieces of Chicago Architecture John Zukowsky, Martha Thorne, 2004 Over 200 illustrations drawn from the Art Institute of Chicago's repository of architectural drawings, models and building fragments present a striking record of Chicago's great buildings and structures

Chicago Architecture The Chicago Architecture Foundation, Edward Keegan, 2008-05-27 Universally recognized as an architectural center, Chicago contains some of the world's finest buildings by the most renowned architects of the nineteenth and twentieth centuries. Frank Lloyd Wright, Louis Sullivan, Mies van der Rohe and many more left their stamp on the city's skyline and as a result influenced the practice of architecture across the globe. This book, published in association with the Chicago Architecture Foundation, features an in-depth analysis of forty-two seminal works of Chicago architecture. This accessible and engaging volume is the latest addition to the successful Universe Architecture Series. Both a guide for those visiting the city and a valuable reference for architecture enthusiasts, Chicago Architecture includes residential icons such as Mies van der Rohe's 860 Lake Shore Drive skyscraper, prototypes such as Sullivan's Schlesinger and Mayer Store, Carson Pirie Scott Co, and engineering masterpieces such as Skidmore, Owings & Merrill's Sears Tower.

The Space Within Patrick F. Cannon, 2016 For the first time, the interiors of some of the Chicago area's greatest buildings designed by celebrated architects are brought together and featured in truly stunning original photographs. These Chicago area homes, religious spaces and commercial and public structures give visual meaning to Frank Lloyd Wright's belief that the space within becomes the reality of the building. Beginning with the Clarke House of 1836 and continuing to the present, every type and style of building is presented. Famous residences such as Wright's Robie House and Mies van der Rohe's Farnsworth House are here, but so are more modest and not so modest homes by Walter Burley Griffin, George Washington Maher and Paul Schweikher. The ornate warmth of Adler and Sullivan's Auditorium Building provides striking contrast to the modern, towering underground stacks of Helmut Jahn's Mansueti Library. The soaring Bahá'í Temple by Louis Bourgeois is elegantly highlighted alongside a humble chapel in St. Procopius Abbey Church by Edward Dart. And commercial buildings by Daniel Burnham, John Wellborn Root, John Holabird, Martin Roche and many more reaffirm Chicago's position as a great business center. These architects and their contemporaries have made the Chicago area a mecca for both architects and lovers of architecture from around the world. Text by author Patrick F. Cannon, who has lived and worked in Chicago and its suburbs for more than sixty years, discusses each building's architecture, architect and place in history. James Caulfield, a noted architectural photographer, leads a visual tour into both the intimate and grand interiors of the Chicago area's finest buildings. Now the duo's fifth book, *The Space Within*, demonstrates that good design comes in many styles. While many of these architectural masterpieces are open to the public, others, particularly the private homes, can only be seen here.

Chicago Architecture and Design (3rd edition) Jay Pridmore, George A. Larson, 2018-09-18 The birthplace of the skyscraper, Chicago is famous for an architectural tradition that has influenced building around the globe. It is the cradle of

Henry Ives Cobb's Chicago Edward W. Wolner, 2011-06-15 When championing the commercial buildings and homes that made the Windy City famous one can't help but mention the brilliant names of their architects Daniel Burnham Louis Sullivan and Frank Lloyd Wright among others But few people are aware of Henry Ives Cobb 1859 1931 the man responsible for an extraordinarily rich chapter in the city's turn of the century building boom and fewer still realize Cobb's lasting importance as a designer of the private and public institutions that continue to enrich Chicago's exceptional architectural heritage Henry Ives Cobb's Chicago is the first book about this distinguished architect and the magnificent buildings he created including the Newberry Library the Chicago Historical Society the Chicago Athletic Association the Fisheries Building for the 1893 World's Fair and

the Chicago Federal Building Cobb filled a huge institutional void with his inventive Romanesque and Gothic buildings something that the other architect giants occupied largely with residential and commercial work did not do Edward W Wolner argues that these constructions and the enterprises they housed including the first buildings and master plan for the University of Chicago signaled that the city had come of age that its leaders were finally pursuing the highest ambitions in the realms of culture and intellect Assembling a cast of colorful characters from a free wheeling age gone by and including over 140 images of Cobb s most creative buildings Henry Ives Cobb s Chicago is a rare achievement a dynamic portrait of an architect whose institutional designs decisively changed the city s identity during its most critical phase of development
