Hale Puckle,2015-06-24 Excerpt from Elementary Treatise on Conic Sections and Algebraic Geometry With Numerous Examples and Hints for Their Solution Especially Designed for the Use of Beginners The first edition of this book was published shortly after the appearance of Dr Salmon's admirable treatise with the hope that I could write a short and easy work upon a similar plan without losing the obvious advantages of his harmonious and consecutive arrangement of the subject Hence the Reduction of the General Equation of the Second Degree will be found to precede the discussion of the properties of the curves and the Parabola is treated of after the Ellipse and Hyperbola but I have arranged the chapter on the Reduction of the General Equation so that a very small part of it will suffice when the subject is read for the first time My chief object was to write with special reference to those difficulties and misapprehensions which I had found most common to beginners In the later editions I have tried without losing sight of my original purpose to make the book suitable to the requirements of the time The present edition has been carefully revised throughout I have added a considerable amount of new matter especially in the way of illustrative examples worked out I have also changed the notation of the General Equation of the Second Order to that used by Dr Salmon About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
