Conspiracy Culture Dr Peter Knight,Peter Knight,2013-04-15 Conspiracy theories are everywhere in post war American culture From postmodern novels to The X Files and from gangsta rap to feminist polemic there is a widespread suspicion that sinister forces are conspiring to take control of our national destiny our minds and even our bodies Conspiracy explanations can no longer be dismissed as the paranoid delusions of far right crackpots Indeed they have become a necessary response to a risky and increasingly globalized world in which everything is connected but nothing adds up Peter Knight provides an engaging and cogent analysis of the development of conspiracy culture from 1960s countercultural suspicions about the authorities to the 1990s

where a paranoid attitude is both routine and ironic Conspiracy Culture analyses conspiracy narratives about familiar topics like the Kennedy assassination alien abduction body horror AIDS crack cocaine the New World Order as well as more unusual ones like the conspiracies of patriarchy and white supremacy Conspiracy Culture shows how Americans have come to distrust not only the narratives of the authorities but even the authority of narrative itself to explain What Is Really Going On From the complexities of Thomas Pynchon's novels to the endless mysteries of The X Files Knight argues that contemporary conspiracy culture is marked by an infinite regress of suspicion Trust no one because we have met the enemy and it is us

Rewiring the Real Mark C. Taylor, 2013-01-22 Digital and electronic technologies that act as extensions of our bodies and minds are changing how we live think act and write Some welcome these developments as bringing humans closer to unified consciousness and eternal life Others worry that invasive globalized technologies threaten to destroy the self and the world Whether feared or desired these innovations provoke emotions that have long fueled the religious imagination suggesting the presence of a latent spirituality in an era mistakenly deemed secular and posthuman William Gaddis Richard Powers Mark Danielewski and Don DeLillo are American authors who explore this phenomenon thoroughly in their work Engaging the works of each in conversation Mark C Taylor discusses their sophisticated representations of new media communications

information and virtual technologies and their transformative effects on the self and society He focuses on Gaddis's *The Recognitions* Powers's *Plowing the Dark* Danielewski's *House of Leaves* and DeLillo's *Underworld* following the interplay of technology and religion in their narratives and their imagining of the transition from human to posthuman states Their challenging ideas and inventive styles reveal the fascinating ways religious interests affect emerging technologies and how in turn these technologies guide spiritual aspirations To read these novels from this perspective is to see them and the world anew

Multimodal Poetics in Contemporary Fiction Thomas Mantzaris, 2024-10-24 This book explores the growing body of multimodal literary texts books that creatively experiment with the potential of design to represent narrative content Examining five North and Central American novels from the first two decades of the twenty first century this study draws attention to texts that combine verbal text writing with non verbal elements photographic images varied typography maps color etc as integral parts of their narratives Their experimentation both reconfigures the potential for print based and born digital fiction in the future and holds a mirror to past practices of design and typography that were rendered invisible or which received limited attention by authors publishers and readers By placing the five case studies and related texts within a broader history of experimentation in literature this book demonstrates how multimodal novels have changed the conceptualization of narrative content in literary texts and ushered in a new era for fiction
