Library,1982 **The Art and Science of HDR Imaging** John J. McCann,Alessandro Rizzi,2011-10-04 Rendering High Dynamic Range HDR scenes on media with limited dynamic range began in the Renaissance whereby painters then photographers learned to use low range spatial techniques to synthesize appearances rather than to reproduce accurately the light from scenes The Art and Science of HDR Imaging presents a unique scientific HDR approach derived from artists understanding of painting emphasizing spatial information in electronic imaging Human visual appearance and reproduction rendition of the HDR world requires spatial image processing to overcome the veiling glare limits of optical imaging in eyes and in cameras Illustrated in full colour throughout including examples of fine art paintings HDR photography and multiple exposure scenes this book uses techniques to study the HDR properties of entire scenes and measures the range of light of scenes and the range that cameras capture It describes how electronic image processing has been used to render HDR scenes since 1967 and examines the great variety of HDR algorithms used today Showing how spatial processes can mimic vision and render scenes as artists do the book also Gives the history of HDR from artists spatial techniques to scientific image processing Measures and describes the limits of HDR scenes HDR camera images and the range of HDR appearances Offers a unique review of the entire family of Retinex image processing algorithms Describes the considerable overlap of HDR and Color Constancy two sides of the same coin Explains the advantages of algorithms that replicate human vision in the processing of HDR scenes Provides extensive data to test algorithms and models of vision on an accompanying website www.wiley.com/go/mccannhdr Popular Photography ,1983-05 **Seizing the Light: A Social History of Photography** Robert Hirsch,2009 Contains images and commentary by hundreds of international artists **Framing a Lost City** Amy Cox Hall,2017-11-22 An engaging study of Machu Picchu s transformation from ruin to World Heritage site and the role a National Geographic photo feature played Latin American Research Review When Hiram Bingham a historian from Yale University first saw Machu Picchu in 1911 it was a ruin obscured by overgrowth whose terraces were farmed by a few families A century later Machu Picchu is a UNESCO World Heritage site visited by more than a million tourists annually This remarkable transformation began with the photographs that accompanied Bingham s article were published in National Geographic magazine which depicted Machu Picchu as a lost city discovered Focusing on the practices technologies and materializations of Bingham s three expeditions to Peru in the first decade of the twentieth century this book makes a convincing case that visualization particularly through the camera played a decisive role in positioning Machu Picchu as both a scientific discovery and a Peruvian heritage site Amy Cox Hall argues that while Bingham s expeditions relied on the labor knowledge and support of Peruvian elites intellectuals and peasants the practice of scientific witnessing and photography specifically converted Machu Picchu into a cultural artifact fashioned from a distinct way of seeing Drawing on science and technology studies she situates letter writing artifact collecting and photography as important expeditionary practices that helped shape the way we understand Machu Picchu today Cox Hall also demonstrates that the photographic evidence was

unstable and as images circulated worldwide the lost city took on different meanings especially in Peru which came to view the site as one of national patrimony in need of protection from expeditions such as Bingham's
