Reframing the Roman Economy Dimitri Van Limbergen, Adeline Hoffelink, Devi Taelman, 2022-11-17 This book focuses on those features of the Roman economy that are less traceable in text and archaeology and as a consequence remain largely underexplored in contemporary scholarship By reincorporating for the first time these long obscured practices in mainstream scholarly discourses this book offers a more complete and balanced view of an economic system that for too long has mostly been studied through its macro economic and large scale and thus archaeologically and textually omnipresent aspects The topic is approached in five thematic sections covering unusual actors and perspectives unusual places of production exigent landscapes of exploitation less visible products and artefacts and divergent views on emblematic economic spheres To this purpose the book brings together a select group of leading scholars and promising early career researchers in archaeology and ancient economic history well positioned to steer this ill developed but fundamental field of the Roman economy in promising new directions
