Color It True Murray Pomerance,2021-12-16 This often startlingly original book introduces a new way of thinking about color in film as distinct from existing approaches which tend to emphasize either technical processes and or histories of film coloration or the meaning s of color as metaphor or symbol or else part of a broader signifying system Murray Pomerance s latest meditation on cinema has the author embed himself in various ways of thinking about color not ways of framing it as a production trick or a symbolic language but ways of wondering how the color effect onscreen can work in the act of viewing Pomerance examines many issues including acuity dreaming interrelationships saturations color contrasts color and performance color as a performance aid or even performance substitute and more The lavender of the photographer s seamless in Antonioni s Blow Up taken in itself as an

explosion of color worked into form and then considered both as part of the story and part of our experience The 14 chapters of this book each discuss a single primary color as regards to our experience of cinema After opening the idea of such an exploration in terms of the history of our apperception and the variation in our experience that color germinates Color it True takes form

The Rationality of Perception Susanna Siegel, 2017 One of the most important divisions in the human mind is between perception and reasoning We reason from information that we take ourselves to have already but perception is a means of taking in new information Reasoning can be better or worse but perception is considered beyond reproach The Rationality of Perception argues that these two aspects of the mind become deeply intertwined when beliefs fears desires or prejudice influence what we perceive When the influences reach all the way to perceptual appearances we face a philosophical problem is it reasonable to strengthen what one believes or fears or suspects on the basis of an experience that was generated by those very same beliefs fears or suspicions Drawing on examples involving racism emotion and scientific theories Siegel argues that perception itself can be rational or irrational and makes vivid the relationship between perception and culture
