Music in the Primary School Janet Mills, 2009. This long awaited new edition of *Music in the Primary School* is for all those involved in Primary music for music specialists and non specialists teachers and advisers. An indispensable handbook it contains practical advice and ideas for facilitating listening, composing and performing with reference to the National Curriculum. Part 1 focuses on the organization of music making and suggests inclusive activities while Part 2 presents a theoretical framework for curriculum planning.

Scientifically Grounded System of Elementary Musical Education of Children John Andrew Stevens, 2012. Informative, educational and compelling. *Scientifically Grounded School of Primary Musical Upbringing and Education of Children* reveals a myriad of eye opening ways to teach a child musical instruments whilst developing his interest through optimizing the teaching process. Written by John Andrew Stevens, this compilation shares a groundbreaking vision wherein a child sees a musical school as a place of joy and fun regardless of the child's initial musical inclinations. In this compelling piece, John Andrew Stevens introduces his innovative scientific discovery which ensures that children will receive the optimum level of musical education thus following some custom fit goals that are suitable for their age. The materials for the school system identified by Stevens are divided into five different parts and are integrated based on the dynamics of the child's growth and development. A boon to all teachers and musical school administrations, this book elucidates the holistic science of music education which involves high level patterns of training and theoretical principles that support the cognitive levels of the children. It is also very helpful for researcher specialists and the scientists working in the area of musical education and youth. Finally, the ones who can remarkably benefit from this book are the children themselves who are fascinated by music and are enthusiastic about exploring the field of music.

Music and Consciousness David Clarke, Eric F. Clarke, 2011-07-28
Consciousness has been described as one of the most mysterious things in the universe Scientists philosophers and commentators from a whole range of disciplines can t seem to agree what it is or why it is that the whole rich panoply of human experience seems to emerge from a lump of squishy grey matter in our heads Most agree though that consciousness represents a Hard Problem and consciousness studies has emerged as a quasi discipline over recent years as a multidisciplinary discourse seeking to address these and other fascinating and perplexing questions While the arts and humanities have joined the sciences at the debating table music has been relatively under represented until now This book redresses this balance Its 20 essays offer different takes on issues around music and consciousness both addressing existing agendas and introducing new ones No single view emerges but what the collection as a whole makes clear is that to understand consciousness we need to do much more than look at brains Studying music makes it clear that consciousness is as much to do with minds bodies culture and history The book which includes several chapters drawing from Eastern philosophies also provides a corrective to any perception that the study of consciousness is a purely Western preoccupation In addition to what it says about consciousness the book also and perhaps primarily represents a new configuration of writings about music
