National Aeronautics and Space Administration,1962 The W3 Algebra Peter Bouwknegt,Jim McCarthy,Krzysztof Pilch,2008-09-11 The study of W algebras began in 1985 in the context of two dimensional conformal field theories the aim being to explore higher spin extensions of the Virasoro algebra Given the simultaneous growth in the understanding of two dimensional metric gravity inspired by analyses of string models it was inevitable that these algebras would be applied to give analogues of putative higher spin gravity theories This book is an exposition of the past few years of our work on such an application for the algebra in particular the BRST quantization of the n critical 4D string We calculate the physical spectrum as a problem in BRST cohomology The corresponding operator cohomology forms a BV algebra for which we provide a geometrical model The algebra has one further generator of spin three in addition to the spin two energy momentum tensor which generates the Virasoro algebra Contrary to the Virasoro algebra it is an algebra defined by nonlinear relations In deriving our understanding of the resulting gravity theories we have had to develop a number of results on the representation theory of W algebras to replace the standard techniques that were so successful in treating linear algebras *Strings 2001* Atish Dabholkar,2002 String theory sometimes called the Theory of Everything has the potential to provide answers to key questions involving quantum gravity black holes supersymmetry cosmology singularities and the symmetries of nature This multi authored book summarizes the latest results across all areas of string theory from the perspective of world renowned experts including Michael Green David Gross Stephen Hawking John Schwarz Edward Witten and others The book comes out of the Strings 2001 conference organized by the Tata Institute for Fundamental Research Mumbai India the Abdus Salam ICTP Trieste Italy and the Clay Mathematics Institute Cambridge MA USA Individual articles discuss the study of D branes black holes string
