## **Redefining Sustainable Development:**

Redefining Sustainable Development Neil Middleton, Philip O'Keefe, 2001 A critical account of the politics of aid giving

Redefining Sustainable Development Neil Middleton, Phil O'Keefe, 2001-03-20 Development and assistance in disasters is about helping people to help themselves It is to do with facilitating sustainable livelihoods and addressing the ills of social discrimination These seem to be self evident propositions In fact they are a minefield If development workers intervene to assist in the creation of environmentally sustainable livelihoods what judgemental codes are contained in the everyday cultural and linguistic assumptions of development practitioners What account do they give of the environment and people's relationship to it If livelihoods are to be economically sustainable by which economic criteria is the judgement made Is the objective to keep projects going until the funds run out or like cancer patients to survive for five years or to knit people into the world's trading systems If projects are to be sustainable they must be socially just By whose justice do we judge At present much development and disaster relief work derives its importance solely from providing opportunities for honing survival skills The authors of this book examine these questions and others in detail and argue that the assumptions of the social democratic world including those of international NGOs are tied to the perpetuation of capitalism Neil Middleton and Phil O'Keefe suggest that the issue in the face of anarchic global financial power is to rethink the nature of class in a late capitalist world and to recognise indigenous NGOs as the new political vehicles for its struggle
