The Metaphysics of Identity over Time D. Oderberg,1993-10-21 This book is a systematic investigation into the metaphysical foundations of identity over time The author elaborates and evaluates the most common theory about the persistence of objects through time and change namely the classical theory of spatio temporal continuity He shows how the theory requires an ontology of temporal parts according to which objects are made up of temporally extended segments or stages This ontology is criticized as unwarranted by modern space time physics and as internally incoherent The author argues that identity over time should be seen as a primitive or unanalysable phenomenon and that the so called puzzle cases and paradoxes of identity can be dealt with without recourse to such an ontology

Machiavelli and Epicureanism Robert J. Roecklein, 2012-10-05 This book investigates the influence of Epicurean physics on the argument developed in Machiavelli's Discourses on Livy Towards this end the full philosophical history and origins of atomist philosophy are investigated during the first three chapters Plato's critique of the atomist philosophy from his dialogue the Parmenides is a part of that investigation In fact Plato provides a refutation of the atomist philosophy in the Parmenides A significant amount of scholarship has been accomplished that demonstrates the currents of Lucretian atomism in Machiavelli's Florence Evidence is supplied as to Machiavelli's exposure to the Lucretian text and the book then proceeds to investigate the transformational arguments of the Discourses On Livy itself Machiavelli's Discourses are saturated with terminology that is borrowed from physics *materia* *Matter* *corpo* *body* *forma* *form* *accidente* *accident* English translators have usually employed some theory as to which tradition of physics Machiavelli is relying upon in order to conduct their translations By borrowing the terminology of Lucretian physics Machiavelli becomes able to conceive of the people in a political society as something less than human as matter or *materia* without form In my analysis of Machiavelli's deployment of the concepts from Lucretian physics it is attempted to unveil the brutality that is inherent in Machiavelli's new definitions of the elements of politics and the general hostility of his political science to the Aristotelian concept of the human being as political animal The classical physics of Aristotle which Machiavelli has rejected for a model indicates the forward looking momentum of natural beings For Aristotle nature intends human political society as the arena for human fulfillment In Aristotelian physics nature aims at an end in generation i.e. at a culmination of the natural being in its proper condition of excellence For human beings this is justice the quality of relationships that makes happiness possible In Machiavelli a new politicized physics is revealed In Machiavelli's model the human beings of formed matter are repeatedly sent through new institutions and methods of government back to their beginnings i.e. to a condition of isolation destitution injury and pain The last chapter of

the book concludes with an examination of the particular institutions and methods that Machiavelli holds out to us for employment if his new vision of a republic is to be realized
