allow the use of personal property and fixtures to secure credit Similarly the creation priority perfection and enforcement of security interests in personal property should be simplified and supported by a framework that ensures that neither the interests of secured lenders nor debtors are hampered so as to guarantee the continuous availability of affordable credit as well as debtors willingness to borrow and do business The book further argues that in addition to the obvious preference for real property over personal property by secured lenders due to the unreformed secured transactions legal framework in Nigeria its compartmentalized nature has also resulted in unpredictability in commerce and the concomitant effects of poor access to credit Through the comparative research conducted in this book utilizing the UCC Article 9 and Ontario PPSA as benchmarks the author provides reformers with a repository of tested secured transactions law solutions which law reformers in the Commonwealth countries in Africa and beyond as well as the business community will find valuable in dealing with issues that stem from secured transactions **Financial Technologies and DeFi** Abeba N.
