Technological Innovation      *Chain Store Age* ,1999      *eBoys* Randall E. Stross,2001-03-01 In *eBOYS* Randall Stross takes us behind the scenes and inside the heads of the gutsy entrepreneurs who are financing the hottest businesses on the Web. The six tall men who started Benchmark Silicon Valley's most exciting venture capital firm put themselves at the cutting edge of the new economy by backing billion dollar start ups like eBay and Webvan. The risks were enormous but the rewards have proven to be staggering. Within two years eBay's net worth grew from 20 million to more than 21 billion while each Benchmark founding partner saw his own personal net worth soar by hundreds of millions of dollars. For two roller coaster years Stross had total access not only to Benchmark's executives but to the companies they financed. He was a fly on the wall as fortunes were made in an instant snap decisions got locked in and new ventures took off and sometimes crashed. Here are the testosterone pumped conversations round the clock meetings and gutsy deals that launched the eBoys and their clients into the stratosphere of mega wealth. Written like a novel but absolutely true *eBOYS* brings to vivid life the glory days of the greatest business adventure of our time.

*Game After* Raiford Guins,2014-01-24 A cultural study of video game afterlife whether as emulation or artifact in an archival box or at the bottom of a landfill. We purchase video games to play them not to save them. What happens to video games when they are out of date broken nonfunctional or obsolete. Should a game be considered an ex game if it exists only as emulation as an artifact in museum displays in an archival box or at the bottom of a landfill. In *Game After* Raiford Guins focuses on video games not as hermetically sealed within time capsules of the past but on their material remains how and where video games persist in the present. Guins meticulously investigates the complex life cycles of video games to show how their meanings uses and values shift in an afterlife of disposal ruins and remains museums archives and private collections. Guins looks closely at video games as museum objects discussing the recontextualization of the Pong and Brown Box prototypes and engaging with curatorial and archival practices across a range of cultural institutions aging coin op arcade cabinets the documentation role of game cartridge artwork and packaging the journey of a game from flawed product to trash to memorialized relic as seen in the history of Atari's infamous E.T. The Extra Terrestrial and conservation restoration and re-creation stories told by experts including Van Burnham Gene Lewin and Peter Takacs. The afterlife of video games whether behind glass in display cases or recreated as an iPad app offers a new way to explore the diverse topography of game history.
