Managing Today's Public Library:

Managing Today's Public Library Darlene E. Weingand, 1994-03-15 Marketing concepts such as product mix line and item are brought into the context of public libraries Focus is always on the library client as the author covers subjects from the public library mission leadership and technology to service priorities staff development and evaluation This dynamic work treats the complex nature of public library service as an opportunity for excellence and diversity It will serve as a primary source for public library personnel at all levels of management in libraries serving communities of varying sizes and structures **Knowin' All Them Things that Ain't So** Thomas H. Ballard, 1985 **Library Management Problems**

Today Wayne Disher, 2021-03-25 Here s the first comprehensive case studies in library management book to be published since 1981 The book use case studies gleaned from TODAY S library world to help students take analytical approaches to library problems Much research points to the fact that students are more inductive than deductive reasoners Therefore books like this which provide actual examples to explore and think about are far more useful than many of the existing texts which start with theory and basic principles Case studies are often used in business law and medical schools This book will facilitate instructors pushing want students to explore how what they have learned applies to real world situations Cases are organized in six sections that parallel basic library management functions

Planning Organizing Leading Controlling Staffing Communicating Each section features case studies each with the case description and three responses from library leaders from a wide variety of library types and sizes Library Management Problems Today Case Studies will allow students to put themselves in the center of actual library problems and ask What would I do *Marketing Library and Information Services* Dinesh K. Gupta, 2006 Marketing of library services has now been recognised as an essential agenda item for almost all kinds of libraries all over the world As the term marketing has different meanings for different colleagues the bundling of dozens of contributions from a truly international group of librarians is presented in this book provides a broad scala on the topic Therefore this book offers a useful tool for both working librarians and future librarians to understand vital issues relating to marketing of library and information services at the local national and international level The book is divided into six sections Marketing concept a changing perspective Marketing in libraries around the world Role of library associations Education training and research Excellence in marketing Databases and other marketing literature **Current Practices and Future Plans of Public Library Webmasters** Primary Research

Group, 2005 The new report from Primary Research Group is based on interviews with webmasters from the San Jose Public Library the Salt Lake City Public Library the Alexandria Library the Los Angeles Public Library the Charlotte Mecklenburg County Public Library the Houston Public Library the Carnegie Library of Pittsburgh the Colorado Virtual Library and the Boston Public Library A free sample chapter is available for download A few of the report s conclusions are summarized below CONTENT MANAGEMENT Libraries take widely varying approaches to the issue of how should control the website and

who should be empowered to add content to the site Some libraries prefer to centralize access in the hands of just a few librarians who act as gatekeepers to the website Others prefer to empower as many librarians as possible to contribute to the site and to oversee their own contributions to the site To achieve this some libraries have purchased off the shelf content management systems while others have developed in house content management systems that allow non technical librarians to function independent of the need for technical help

THE IMPACT OF CASCADING STYLE SHEETS CSS Cascading style sheet that allow librarians to edit entire sites or subsets of site with one click of the mouse have become popular ways to introduce some uniformity and lower the labor demand of editing public library websites Cascading style sheets are important because librarians are finding more and more reasons to add more and more content to their sites Public library websites have often quickly become unwieldy monsters that voraciously eat up librarian time Correcting and editing these beasts by hand is dangerous and cascading style sheets allow proper measured feeding without loss of limb

MOST POPULAR PAGES Some of the most popular pages on the public library websites surveyed were the events calendar basic library info page database gateways and children s and teen pages

STAFFING Relative to the importance of the library website to the overall success of the library the size of most library web staffs when such staffs exist is quite small Usually one to three individuals run the website and they often have other responsibilities The strategy that most have pursued to overcome their small staffs is to devolve responsibility for content to subject specialist librarians and to empower them to be able to edit the portions of the website for which they are responsible

UNIQUE CONTENT Most librarians interviewed stressed the need to develop unique content that would draw traffic to the website Among the type of content mentioned were interactive storytelling and educational games reading lists and contests book reviews by librarians posted online subject guides and events calendars

CHILDREN S TEEN SERVICES One of the most vibrant areas for website development has been services for children and teens This age group grew up with access to the world wide web and it is truly the only generation for which web use and communication is as natural as turning on the television for most Americans Libraries have responded with books clubs personalized spaces interactive stories and games and other features aimed at this audience Nonetheless many libraries have just scraped the surface of their potential in this area We like what the Charlotte Mecklenburg County Public Library has done in this area developing unique content focused marketing and web teams to create a unique site for Charlotte area children

SPECIAL COLLECTIONS Many libraries have plans to digitize their special collections or at the very least to digitize finding aids for those collections and increase access to them through the library website We expect that this will soon become a major area of public library investment and a challenge for website administrators who must devise access schemes to digitized resources

Human Resource Management in Today's Academic Library Janice Simmons-Welburn, Beth McNeil, 2004-01-30 This book provides a comprehensive look at issues that shape the nature of Human Resources in academic libraries Libraries in varying academic environments have undergone tremendous change

during the last two decades of the 20th century as they have sought redefinition as learning organizations As organizations they have experienced significant changes in the role and definition of professionalism along with challenges from such shifting workplace demographics as age and ethnicity and technological issues which have also had direct impact on the recruitment and retention of staff Much of the attention of human resources administrators in academic libraries has focused on an array of issues that mirrors concerns across campuses affirmative action and diversity the rights of employees with disabilities under the Americans with Disabilities Act the impact of the Family Medical Leave Act and other directives on employee benefits salary equity and a desire among employees for flexible work schedules
