Moving Envelopes of Stars Viktor Viktorovich Sobolev, 1960 Moving Envelopes of Stars ... Translated by Sergei Gaposchkin Viktor Viktorovich SOBOLEV, Sergei GAPOSCHKIN, 1960 *The Astrophysics of Emission-Line Stars* Tomokazu Kogure, Kam-Ching Leung, 2010-05-05 Many types of stars show conspicuous emission lines in their optical spectra These stars are broadly referred to as emission line stars Emission line stars are attractive to many people because of their spectacular phenomena and their amazing varieties and variability This book offers general information on emission line stars starting from a brief introduction to stellar astrophysics and then moving to a broad overview of emission line stars including early and late type stars as well as pre main sequence stars Detailed references and index are prepared for further reading Tomokazu Kogure's email address tkogure pa2 so net ne jp NASA Technical Translation, 1969 New Perspectives on Stellar Pulsation and Pulsating Variable Stars James M. Nemec, Jaymie M. Matthews, 1993-10-21 How can the interior of the Sun white dwarfs and other stars be studied by stellar seismology What can Doppler imaging tell us about high degree pulsations What impact are CCD and infrared observations having on extending the Cepheid and RR Lyrae distance scale And how are other classes of pulsators providing independent checks of the distance scale These and many other critical questions are answered in this timely review of the dramatic advances made in pulsating star research in the last decade This survey collects together more than thirty comprehensive reviews and over one hundred summaries of research papers from the 139th IAU Colloquium held in Victoria British Columbia Together these cover all aspects of recent developments in the field of variable star research and preview some of the exciting advances anticipated for the next decade This volume provides an essential review for graduate students and researchers *Luminous Stars and Associations in Galaxies* International Astronomical Union. Symposium, 1986-06-30 Proceedings of the 116th Symposium of the International Astronomical Union held at Porto Heli Greece May 26 31 1985 Nuclear Science Abstracts, 1976-05 **Wolf-Rayet and High-Temperature Stars** M.K.V. Bappu, J. Sahade, 2012-12-06 We have in this volume compiled a connected account of the proceedings of the Symposium on Wolf Rayet and High Temperature Stars held at Buenos Aires The Organizing Committee had assigned broad areas of topical interest to be reviewed by invited speakers Each of these presentations was followed by lengthy discussions that were tape recorded and transcribed later These discussions have been edited only to a limited extent We have shortened them and rearranged them to bring about a greater coherence We have however attempted to retain the tenor of the discussions the flavour of impromptu remarks and the continuity of an argument Much of the success of such a venture depends on the contributors to the discussions To be able to make these thoughts available to a larger audience has been the task of those responsible for the elaborate tape recording of the proceedings We thank those at the Instituto de Astronomia y Fisica del Espacio for the efficient way in which this responsibility has been discharged Many at Buenos Aires

and Kodaikanal have contributed efficient assistance to the preparation of this volume and we are deeply indebted for their help. In particular two amongst these, Nora Martinez and A. M. Batcha, have contributed overwhelmingly both to the organization of the symposium and the final preparation of the symposium volume. Financial support for this symposium came from the International Astronomical Union and the Argentine National Research Council.
