Mr. Menzies' Garden Legacy Clive L. Justice, 2000 **Ancient Pathways, Ancestral Knowledge** Nancy J.

Turner, 2014-06-01 Volume 1 The History and Practice of Indigenous Plant Knowledge Volume 2 The Place and Meaning of Plants in Indigenous Cultures and Worldviews Nancy Turner has studied Indigenous peoples knowledge of plants and environments in northwestern North America for over forty years In *Ancient Pathways Ancestral Knowledge* she integrates her research into a two volume ethnobotanical tour de force Drawing on information shared by Indigenous botanical experts and collaborators the ethnographic and historical record and from linguistics palaeobotany archaeology phytogeography and other fields Turner weaves together a complex understanding of the traditions of use and management of plant resources in this vast region She follows Indigenous inhabitants over time and through space showing how they actively participated in their environments managed and cultivated valued plant resources and maintained key habitats that supported their dynamic cultures for thousands of years as well as how knowledge was passed on from generation to generation and from one community to another To understand the values and perspectives that have guided Indigenous ethnobotanical knowledge and practices Turner looks beyond the details of individual plant species and their uses to determine the overall patterns and processes of their development application and adaptation Volume 1 presents a historical overview of ethnobotanical knowledge in the region before and after European contact The ways in which Indigenous peoples used and interacted with plants for nutrition technologies and medicine are examined Drawing connections between similarities across languages Turner compares the names of over 250 plant species in more than fifty Indigenous languages and dialects to demonstrate the prominence of certain plants in various cultures and the sharing of goods and ideas between peoples She also examines the effects that introduced species and colonialism had on the region s Indigenous peoples and their ecologies Volume 2 provides a sweeping account of how Indigenous organizational systems developed to facilitate the harvesting use and cultivation of plants to establish economic connections across linguistic and cultural borders and to preserve and manage resources and habitats Turner describes the worldviews and philosophies that emerged from the interactions between peoples and plants and how these understandings are expressed through cultures stories and narratives Finally she explores the ways in which botanical and ecological knowledge can be and are being maintained as living adaptive systems that promote healthy cultures environments and indigenous plant populations *Ancient Pathways Ancestral Knowledge* both challenges and contributes to existing knowledge of Indigenous peoples land stewardship while preserving information that might otherwise have been lost Providing new and captivating insights into the anthropogenic systems of northwestern North America it will stand as an authoritative reference work and contribute to a fuller understanding of the interactions between cultures and ecological systems **Madness, Betrayal and the Lash** Stephen R. Bown, 2009-12-01 From 1792 to 1795 George Vancouver sailed the Pacific as the captain of his own expedition and as an agent of imperial ambition To map a place

is to control it and Britain had its eyes on America's Pacific coast And map it Vancouver did His voyage was one of history's greatest feats of maritime daring discovery and diplomacy and his marine survey of Hawaii and the Pacific coast was at its time the most comprehensive ever undertaken But just two years after returning to Britain the 40 year old Vancouver hounded by critics shamed by public humiliation at the fists of an aristocratic sailor he had flogged and blacklisted because of a perceived failure to follow the Admiralty's directives died in poverty nearly forgotten In this riveting and perceptive biography historian Stephen Bown delves into the events that destroyed Vancouver's reputation and restores his position as one of the greatest explorers of the Age of Discovery *Kingdom of the Mind* Peter E. Rider, 2006-04-05 Many Canadians with a Scottish background still feel the pull of their Gaelic origins During the eighteenth and nineteenth centuries Scots dominated Montreal and by extension the rest of the country Their habits and attitudes influenced business education science and medicine the military and even the way Canadians imagined themselves **The Sixth Extinction** Terry Glavin, 2025-08-22 The Sixth Extinction is a haunting account of the age in which we live Ecologists are calling it the Sixth Great Extinction and the world isn't losing just its ecological legacy also vanishing is a vast human legacy of languages and our ways of living seeing and knowing Terry Glavin confirms that we are in the midst of a nearly unprecedented catastrophic vanishing of animals plants and human cultures He argues that the language of environmentalism is inadequate in describing the unraveling of the vast system in which all these extinctions are actually related And he writes that we're no longer gaining knowledge with every generation We're losing it In the face of what he describes as a dark and gathering sameness upon the Earth Glavin embarks on a global journey to meet the very things we're losing a distinct species every ten minutes a unique vegetable variety every six hours an entire language every two weeks and on the way encounters some of the world's wonderful rare things a human sized salmon in Russia a mysterious Sino Tibetan song language a Malayan tiger the last of its kind and a strange tomato that tastes just like black cherry ice cream And he finds hope in the most unlikely places a macaw roost in Costa Rica a small village in Ireland a relic community of Norse whalers in the North Atlantic the vault beneath the Royal Botanical Garden at Kew and the throne room of the Angh of Longwa in the eastern Himalayas A fresh narrative take on the usual doom and gloom environmentalism The Sixth Extinction draws upon zoology biology ecology anthropology and mythology to share the joys hidden within the long human struggle to conserve the world's living things Here we find hope in what's left the absolute and stunning beauty in the Earth's last cultures and creatures Journal. American Rhododendron Society, 2000 Northern Lights Edward J. Cowan, 2023-09-05 In the tradition of Arthur Herman's How the Scots Invented the Modern World comes a narrative that charts the remarkable yet often overlooked or misidentified Scottish contribution to Arctic exploration The search for the Northwest Passage is filled with stories of tragedy adventure courage and endurance It was one of the great maritime challenges of the era It was not until the 1850's that the first one way partial transit of the passage was made Previous attempts had all failed and some like the ill fated attempted by Sir John Franklin in 1845 ended

in tragedy with the loss of the entire expedition which was comprised of two ships and 129 men Northern Lights reveals Scotland's previously unsung role in the remarkable history of Arctic exploration There was the intrepid John Ross an eccentric hell raiser from Stranraer and a veteran of three Arctic expeditions his nephew James Clark Ross the most experienced explorer of his generation and discoverer of the Magnetic North Pole Dr John Richardson of Dumfries who became an accidental cannibal and deliberate executioner of a murderer as well as an engaging natural historian and Orcadian John Rae the man who first discovered evidence of Sir John Franklin and his crew's demise Northern Lights also pays tribute and reveals other overlooked stories in this fascinating era of history the Scotch Irish the whalers and especially the Inuit whose unparalleled knowledge of the Arctic environment was often indispensable For anyone fascinated by Scottish history or hungry for tales of Arctic adventure Northern Lights is a vivid new addition to the rich tradition of polar narratives
