Personal Destinies:

Personal Destinies David L. Norton, 1976 What is the meaning of life Modern professional philosophy has largely renounced the attempt to answer this question and has restricted itself to the pursuit of more esoteric truths Not so David Norton Following in the footsteps of Plato and Aristotle Kierkegaard and Nietzsche Jung and Maslow he sets forth a distinctive vision of the individual's search for his place in the scheme of things Norton's theory of individualism is rooted in the eudaimonistic ethics of the Greeks who viewed each person as innately possessing a unique potential it was his destiny to fulfill Very much the same idea resurfaced in modern times with the British idealists and Continental existentialists The author reviews these antecedents showing how his theory differs from those of his predecessors After a fascinating chapter on The Stages of Life Norton shows how the mature consciousness of one's destiny leads to direct intimate knowledge of other persons and how this in turn provides the basis for social morality The conception of justice in which this theory culminates rooted as it is in essential human differences provides a challenging alternative to the much discussed theories of Rawls and Nozick

Your Whole Life James Bernard Murphy, 2020-04-24 A holistic view of human development that rejects the conventional stages of childhood adulthood and old age When we talk about human development we tend to characterize it as proceeding through a series of stages in which we are first children then adolescents and finally adults But as James Bernard Murphy observes growth is not limited to the young nor is decline limited to the aged We are never trapped within the horizon of a particular life stage children anticipate adulthood and adults recapture childhood According to Murphy the very idea of stages of life undermines our ability to see our lives as a whole In *Your Whole Life* Murphy asks what accounts for the unity of a human life over time He advocates for an unconventional developmental story of human nature based on a nested hierarchy of three powers first each person's unique human genome insures biological identity over time second each person's powers of imagination and memory insure psychological identity over time and third each person's ability to tell his or her own life story insures narrative identity over time Just as imagination and memory rely upon our biological identity so our autobiographical stories rest upon our psychological identity Narrative is not the foundation of personal identity as many argue but its capstone Engaging with the work of Aristotle Augustine Jesus and Rousseau as well as with the contributions of contemporary evolutionary biologists and psychologists Murphy challenges the widely shared assumptions in Western thinking about personhood and its development through discrete stages of childhood adulthood and old age He offers instead a holistic view in which we are always growing and declining always learning and forgetting and always living and dying and finds that only in relation to one's whole life does the passing of time obtain meaning

Christianity Panikkar, Raimon, 2015-12-01 *The Fullness of the Logos in the Key of Life* Anna-Teresa Tymieniecka, 2011-09-20 This highly personal account of a lifetime's spiritual and philosophical enquiry charts the author's journey of faith through contemporary culture Distinguishing between what she posits as the universal and the rhapsodic

logos Tymieniecka interrogates concepts as varied as creativity and the media joy and suffering and truth and ambiguity She contemplates the possibilities and limits of communication between human beings and outlines what she calls the transnatural destiny of the human soul The book asserts that unlike theory which unfolds a logical continuity and unlike dialogue which is directed sequentially upward toward intellectual conclusions the mode of reflection of the rhapsodic logos imposes no limits or caps upon its understanding Instead the logoic flow interlaces the rhapsodic cadences of our reflections on reality in all their innumerable fluctuations and sifts them to mold the intimate mind soul inwardness that we experience as faith The radiative meditations of this rhapsodic logos weave their way through the entanglements of the mystery of incarnation the constitutive archetypes the inwardly sacred the transnatural destiny of the soul and finally ascend the rhapsodic scales toward culminating faith in the Christo Logos **The Destiny and Signs of God** Ionel Rotaru,2024-10-21 In the Book The Destiny and Signs of God Spiritual Psychoanalysis the author makes an analysis of his life through the lens of which he tries to convey to the reader God s way of communicating with each of us His life experience is like a model for every reader to learn to communicate with the Universe God directly without interpreters and without intermediaries a unique and personal communication with the Universe from the entire Universe The Destiny and Signs of God contains a poignant set of addictively chronicled teachings about our communication with God in person and shows how we can mobilize ourselves to get the answers to so many situations in our lives Who are we Where do we come from and where do we go How can the paths we choose determine the destiny of our lives In this book you will find specific solutions to save yourself and our civilization from the nightmare of the material life This book makes the connection between science and the Kingdom of Heaven So far our civilization has developed only one method of communication OUR EVERYDAY INTERPERSONAL COMMUNICATION Time has come for all of us to learn a second method of communication to commit our thoughts to COMMUNICATING WITH THE UNIVERSE This book is a new vision of ourselves and the whole universe The author a psychiatrist has described a new form of psychoanalysis known as spiritual psychoanalysis through which the reader will discover a way of communicating with the universe the signs of God as well as a new form of thinking spiritual thinking By interacting with the Universe we communicate with God and God is THE ONLY ONE in the Universe WHO can give us the best advice regarding our choice to build up our destiny and secure ourselves with a sound and continuous evolution

Intimate Relationships Mavis Klein, 2013-09-27 If human life as the author argues is a constant and desperate bid to compensate for our mortality then the desire to love and to be loved is our greatest imagined panacea against the fact of our death In modern Western society our problems have changed now with our stomachs full our need to feel we are struggling to survive has become increasingly focussed on a growing dissatisfaction and insecurity in our personal relationships Drawing on her 35 years experience as an individual and group psychotherapist Mavis Klein here elaborates her original theory of five basic personality types ten compound types and fifteen ways in which the basic types interact with each other in our relationships to others She clearly elucidates the behaviours that disguise our often self-induced pains and how these pains can be transmuted into our greatest talents and joy This book addresses the reality of the world we are so often unwilling to accept the irrational and violent

A discourse Historical Society of Pennsylvania (PHILADELPHIA). Mayer (Brantz),1852 The Short Story Valerie Shaw,2014-07-21 Throughout this text Valerie Shaw addresses two key questions What are the special satisfactions afforded by reading short stories and How are these satisfactions derived from each story s literary techniques and narrative strategies She then attempts to answer these questions by drawing on stories from different periods and countries by authors who were also great novelists like Henry James Flaubert Kafka and D H Lawrence by authors who specifically dedicated themselves to the art of the short story like Kipling Chekhov and Katherine Mansfield by contemporary practitioners like Angela Carter and Jorge Luis Borges and by unfairly neglected writers like Sarah Orne Jewett and Joel Chandler Harris *Growth and Guilt* Luigi Zoja,2003-09-02 The relentless exploitation of the earth s resources and technologys boundless growth are a matter of urgent concern When did this race towards the limitless begin The Greeks who shaped the basis of Western thinking lived in mortal fear of humanity s hidden hunger for the infinite and referred to it as hubris the one true sin in their moral code Whoever desired or possessed too much was implacably punished by nemesis yet the Greeks themselves were to pioneer an unprecedented level of ambition that began to reverse that tabu If it is true that no culture can truly repudiate its origins and that gods who are no longer potent can vanish but still leave behind a body of myth which continues to live and assert itself in modernized garb then our concern with the limits of growth reflects something more than an awareness of new technological problems it also brings to light a psychic wound a a feeling of guilt which are infinitely more ancient **Selected Papers on Philosophy** William James,1918 **The End Times Hoax and the Hijacking of Our Liberty** Steven Wallace,Debra Wallace,2010-02
