Primer In Phenomenological Psychology:

A Primer in Phenomenological Psychology Ernest Keen, 1975 Qualitative Research Methods for Psychologists Constance T. Fischer, 2011-04-28 *Qualitative Research Methods for Psychologists* is a collection of 14 original articles that teaches readers how to conduct qualitative research. Instead of characterizing and justifying certain methods, the contributors show by means of actual research studies what assumptions, procedures, and dilemmas they encountered. Fischer's introduction emphasizes the practical nature of qualitative research, and the closing chapter, which uses a question and answer format to investigate among other subjects what is scientific about qualitative research, is complemented by a glossary and other features that increase the book's utility and value. Addresses a range of practical examples from different traditions such as phenomenology, grounded theory, ethnography, and discourse analysis through actual case studies. Discusses various methodology and combinations of methods like assimilation analysis, dialogical approach, intuitive inquiry, and conceptual encounter. Terms are defined within chapters and/or in a glossary. Helps readers bridge from experimental to qualitative methods. Provides in-depth, philosophically grounded and compelling research findings. Includes practical introduction about steps in qualitative research. Psychological, Archetypal and Phenomenological Perspectives on Soccer David Huw Burston, 2014-08-13 Soccer or football attracts vast numbers of passionate fans from all over the world, yet clinical psychology is yet to study it in depth. In this book, David Huw Burston, a consultant football psychology and performance coach, uses a phenomenological research method inspired by Amedeo Giorgi to consider what we can learn from the spirit of the game and how this can be used positively in the consulting room and on the field of play. By examining detailed qualitative research with professional soccer players of both sexes, Burston identifies and considers nine particular themes, including the family, gods, heroes, and dreams, and discusses how what we can learn from the game of football and team culture can be applied to Jungian analysis today. This book bridges the gap between clinical psychology and sport, outlining potential shortfalls in current youth development in sport as well as discussing how traditional Jungian archetypes can be identified in everyday settings. It will be of key interest to researchers from both the fields of analytical psychology and sports studies.

The Oxford Handbook of Qualitative Research Patricia Leavy, 2020-09-07 *The Oxford Handbook of Qualitative Research*, Second Edition, presents a comprehensive interdisciplinary overview of the field of qualitative research. Divided into eight parts, the forty chapters address key topics in the field, such as approaches to qualitative research, philosophical perspectives, narrative inquiry, field research, and interview methods, text, arts-based and internet methods, analysis and interpretation of findings, and representation and evaluation. The handbook is intended for students of all levels, faculty, and researchers across the disciplines, and the contributors represent some of the most influential and innovative researchers as well as emerging scholars. This handbook provides a broad introduction to the field of qualitative research to those with little to no background in the subject while providing substantive contributions to the field that will be of interest to even the most

experienced researchers It serves as a user friendly teaching tool suitable for a range of undergraduate or graduate courses as well as individuals working on their thesis or other research projects With a focus on methodological instruction the incorporation of real world examples and practical applications and ample coverage of writing and representation this volume offers everything readers need to undertake their own qualitative studies

Forming a Global Community Joseph de Rivera, 2022-10-18 To address global problems such as pandemics warming economic inequality mass migration and widespread terrorism Joseph de Rivera argues that we must form a global community A community of eight billion humans is difficult to conceive However it can be imagined and created if we transform our understanding of who humans are and what community entails We can understand who persons are how they are motivated and how a community can be conceived in a way that offers an alternative to individualism and collectivism The mutualism that is proposed provides a moral compass for navigating the challenges that confront us and encourages specific governing structures political economies and rituals that will further the formation of a global community Based on the philosophical analysis of John Macmurray the author s argument relies on an extensive review of the current literature on self personhood emotional motivation social identity forms of community and religious and secular rituals Interdisciplinary in nature it aims to direct philosophy and the social sciences to the challenges of globalism and the creation of a global community

Towards a History of Consciousness Vwadek P. Marciniak, 2006 Towards a History of Consciousness Space Time and Death offers a cogent and compelling discussion of the neglected topic of the history of consciousness An analysis of our postmodern ontology reveals deep but neglected roots What are those roots and how did they grow Is there a self without consciousness What is the relation of the self to the individual Does the recognition of death contribute to the growth of consciousness As a survey of western history this work pushes the boundaries of the understanding of consciousness in intriguing and sometimes provocative directions This integrative study is intended for the serious curious student and thinker

Chemicals for the Mind Ernest Keen, 2000-02-28 Silently orienting us to the world are traditions embedded in our language These traditions shape how we understand the necessities and possibilities of life and truth Dualism a metaphysical theory is such a tradition and in Keen s view the separate discourses of science and morality create double meanings in our experience Psychopharmacology is a critical intersection of these two worlds where physical compounds are used to change mental life Increasingly the language of neurochemistry formulates that treatment To control ennui with chemicals is to direct our attention away from what is wrong in our lives and to focus instead on what we can control easily by taking a pill Mental life has become marginal in biologically reductionistic discourse While the demystification of human consciousness is surely a cornerstone of modernity in excess it indulges a world design where

nothing is sacred and everything becomes just another phenomenon to which we owe nothing Our practice of manipulating consciousness as an object surrenders the complex reflections of moral ambiguity and struggle Following the example of our doctors Keen asserts we the population neglect what is wrong in our lives Like the rest of nature our minds become exploitable And properties of consciousness become commodities sold by prescription in drug stores A provocative analysis of psychopharmacology this will be of interest to treatment professionals from psychologists psychiatrists and nurses to social workers as well as the interested public *Relationship Pain* Ralph Schillace,2000 Dr Schillace s book is special among works on personal change and psychology that are written for the general public Most books in this genre are written with a one size fits all approach to psychological issues recommended solutions and how people should help themselves *Relationship Pain* offers a more individualized point of view It includes specific chapters on the nature of difficulties in intimate parent child and work relationships It is unique in its examination of the impact of personal trauma and loss on one s interpersonal relations and view of relationships Here Dr Schillace helps to understand the emotional and relational experience when we lose something positive in our lives such as an intimate partner or work position or when we are assaulted by a negative and terrifying experience such as a bad accident or rape This book has much to offer those who suffer a loss or trauma and those who care for them in terms of sensitive understanding and constructive help Taken from the Introduction by Robert Fink Ph D In teaching us how each of us plays a part in creating our own experiences the author extends the ultimate gift he helps us learn how to transcend many of our own crazy ways Reading *Relationship Pain* activates memories fosters personal awareness leads the reader to engage in his or her own healing process Do you seek relief from the discomfort of your relationships Help exists Taken from the Introduction by David Trout Pomeroy Dr Ralph Schillace is a psychologist who lives photo in Rochester Hills Michigan

Meeting the Needs of Parents Pregnant and Parenting After Perinatal Loss Joann O'Leary,Jane Warland,2016-06-17 Despite research which highlights parents increased anxiety and risk of attachment issues with the pregnancy that follows a perinatal loss there is often little understanding that bereaved families may need different care in their subsequent pregnancies This book explores the lived

experience of pregnancy and parenting after a perinatal loss Meeting the Needs of Parents Pregnant and Parenting After Perinatal Loss develops a helpful framework which integrates continuing bonds and attachment theories to support prenatal parenting at each stage of pregnancy Giving insight into how a parent s world view of a pregnancy may have changed following a loss readers are provided with tools to assist parents on their journey The book discusses each stage of a pregnancy as well as labor and the postpartum period before examining subjects such as multi fetal pregnancies reluctant terminations use of support groups and the experiences of fathers and other children in the family The chapters include up to date research findings vignettes from parents reflecting on their own experiences and recommendations for practice Written for researchers students and professionals from a range of health social welfare and early years education backgrounds this text outlines what we know about supporting bereaved families encountering the challenges of a subsequent pregnancy

Self-Observation in the Social Sciences Joshua W. Clegg, 2018-04-17 Notwithstanding the mythical demise of introspection self observation has always been an integral aspect of the social sciences In the century following the behavioral revolution psychology has seen a reduction not so much in the frequency as in the rigor with which self observation is practiced A great deal of self observation has been renamed or obscured as for example self report but this has served only to defer and impoverish important theoretical and technical work This volume which contributes to the development of a rigorous theory of self observation is organized around three general objectives to re animate a discourse on self observation through a historical analysis of various self observation traditions to outline and begin to address some of the unique theoretical challenges of self observation and to elaborate some of the technical and practical details necessary for realizing a program of research dedicated to self observation In the first section of the book three historians of psychology trace the evolution of self observation In the second three scholars who are currently working in contemporary traditions of self observation discuss the basic theoretical and practical challenges involved in conducting self observation research In the final two sections of the book scholars from the phenomenological and narrative traditions trace the history theory and practice of self observation in their respective traditions Self Observation in the Social Sciences continues the fine tradition set by Transaction s History and Theory of Psychology series edited by Jaan Valsiner It is of interest to psychologists and to those who study methodology within the social sciences *Emotion, Social Theory, and Social Structure* J. M. Barbalet, 2001-09-06 Emotion Social Theory and Social Structure takes sociology in a new direction It examines key aspects of social structure by using a fresh understanding of emotions categories Through that synthesis emerge new perspectives on rationality class structure social action conformity basic rights and social change As well as giving an innovative view of social processes J M Barbalet s study also reveals unappreciated aspects of emotions by considering fear resentment vengefulness shame and confidence in the context of social structure While much has been written on the social consequences of excessive or pathological emotions this book demonstrates the centrality of emotions to routine operations

of social interaction Dr Barbalet also re evaluates the nature of social theory for once the importance of emotions to social processes becomes clear the intellectual constitution of sociology and therefore its history must be rethought

Negotiating the Mediated City Zlatan Krajina, 2013-11-26 This book is an interdisciplinary empirical investigation of how people interact with public screens in their daily lives In more and more surprising locations screens of various kinds appear within the sightlines of passers by in contemporary cities Outdoor advertisers target audiences which are increasingly mobile public art uses screens to interrogate urban change while postmodern architecture finds electronic imagery a suitable tool of expression Traditionally urban sociology research has assumed that people seek to filter urban stimuli but recent accounts of public screens suggest producers design and position display interfaces site specifically so as to engage with those moving past This study offers insight both into the dynamics of actual encounters and into the long term process of how people learn to live with repeated invitations to consume media in public spaces The book includes four cases street advertising underground transport advertising and installation art in London UK and media facade architecture in Zadar Croatia Krajina shows that maintaining familiarity with everyday surroundings in media cities that change beyond citizens control is a temporary achievement and a recursive struggle Finalist for the Jane Jacobs Urban Communication Foundation book award 2014

In Search of Nursing Science Anna Omery, Christine E. Kasper, Gayle Page, 1995-01-09 After examining traditional empiricist views of science the contributors focus on the schools of thought that challenge them Next they introduce postmodern schools of thought including feminism phenomenology critical theory and poststructuralism

Them That Believe Ralph Hood, W. Paul Williamson, 2008-09-02 Although outlawed in many states serpent handling remains an active religious practice and one that is far more stereotyped than understood Ralph W Hood Jr and W Paul Williamson have spent fifteen years touring serpent handling churches in Alabama Georgia Tennessee Kentucky North Carolina and West Virginia conducting scores of interviews with serpent handlers and witnessing hundreds of serpent handling services In this illuminating book they present the most in depth comprehensive study of serpent handling to date Them That Believe not only explores facets of this religious practice including handling preaching and the near death experiences of individuals who were bitten but survived but also provides a rich analysis of this phenomenon from historical social religious and psychological perspectives

The Brighter Side Of Human Nature Alfie Kohn, 2008-08-05 Drawing from hundreds of studies in half a dozen fields The Brighter Side of Human Nature makes a powerful case that caring and generosity are just as natural as selfishness and aggression This lively refutation of cynical assumptions about our species considers the nature of empathy and the causes of war why we incorrectly explain all behavior in terms of self interest and how we can teach children to care

Perspectives on Mind H.R. Otto, J. Tuedio, 2012-12-06 Phenomenology and analytic philosophy have skirmished often but seldom in ways conducive to dialectical progress Generally the skirmishes seem more political than philosophical as when one side ridicules the methods of the other or criticizes the viability of the other's issues and assumptions

tions Analytic interest in third person objectivity is often spurned by Continental philosophers as being unduly abstract Continental interest in first person subjectivity is often criticized by analysts as being muddled and imprecise Logical analysis confronts the power of metaphor and judges it too ambiguous for rigorous philosophical activity The language of metaphor confronts the power of logical analysis and deems it too restrictive for describing the nature and structures of authentic human experience But are the two approaches really incompatible Perhaps because each side of the divide has been working at problems largely uninteresting to the opposition it has been easy to ignore or underestimate the importance of this issue But now each side is being led into a common field of problems associated with the nature of mind and there is a new urgency to the need for examining carefully the question of conceptual compatibility and the potential for dialogue Analytic thinkers are typically in the business of concept clarification and objective certification Continental philosophers employ introspection in the interest of a project of description and classification that aims to be true to the full subtlety and complexity of the human condition

Transcendent Teacher Learner Relationships Hunter O'Hara, 2020-10-12 Now more than ever high quality relationships between teachers and learners are critical to deep meaningful learning and to the learner's long term success Transcendent Teacher Learner Relationships The Way of the Shamanic Teacher Second Edition explores the nature of the transcendent teacher learner relationship and precisely how such relationships of warmth safety mutual care mutual respect and mutual trust are developed and maintained Personal narratives from the classroom frontlines as well as the analysis contained herein provide a fresh outlook a roadmap that leads to the most transformative relationships imaginable for teachers and learners
