Breaks in the Air John Klaess, 2022-08-22

In *Breaks in the Air* John Klaess tells the story of rap's emergence on New York City's airwaves by examining how artists and broadcasters adapted hip hop's performance culture to radio. Initially artists and DJs brought their live practice to radio by buying time on low bandwidth community stations and building new communities around their shows. Later stations owned by New York's African American elite such as WBLS reluctantly began airing rap even as they pursued a sound rooted in respectability, urban sophistication and polish. At the same time large commercial stations like WRKS programmed rap once it became clear that the music attracted a demographic that was valuable to advertisers. Moving between intimate portraits of single radio shows and broader examinations of the legal, financial, cultural and political forces that indelibly shaped the sound of rap radio, Klaess shows how early rap radio provides a lens through which to better understand the development of rap music as well as the intertwined histories of sounds, institutions, communities and legal formations that converged in the post-Civil Rights era.

Tunes for All? Iben Havn, Steen Kaargaard Nielsen, Mads Krogh, Morten Michelsen, 2018-12-31 In ten original essays Danish music and media scholars discuss aspects of music on the radio from the 1920s until today. Understanding music radio as a distributed phenomenon or as a multiplicity, the authors draw upon anthropology, cultural studies and media studies along with sociological and historiographical theory. The intention is to further develop interdisciplinary approaches that may grasp the complex interrelations between radio as an institution and as practices on the one hand and music, musical practices and musical life on the other. The essays' examples and cases are all related to the Danish Broadcasting Corporation DR and offer a music radio production perspective. They span the period from when broadcast music was only live to today where almost all of it is prerecorded and digitized. Some of the essays approach broad topics like early music radio's contributions to the regulation of national centres and peripheries, the debates on music radio as mechanical music and the general changes in music repertoires and in the status of the institution's live ensembles. Music radio's roles as gatekeeper through automatic music programming are discussed in several articles as are the many ways music genres and radio formats interact. Some of the authors turn to detailed analyses at programme level in order to explain aspects of modern music radio and to suggest analytical models. The essays come with an introduction consisting of an extended overview of international music radio studies since the 1930s and an overview of the development of Danish music radio and a theoretical preamble.

Global Radio Shaheed Nick Mohammed, 2019-09-25. *Global Radio: From Shortwave to Streaming* chronicles the development of radio as a global medium. In this book, Shaheed Nick Mohammed examines the evolution of radio from its early uses as little more than a novelty into a set of powerful systems for international exchanges of news, culture, and political influence. In doing so, the book follows the development of radio as a wireless form of the telegraph, its evolution into a medium for sound transmission across the air, and its adaptation to digital networked audio and transmissions technologies. Mohammed also outlines the myriad changes in the radio industry in numerous contexts around the globe and over time, including the early development of commercial and non-commercial broadcasting in the United States, Europe, India, and China, and the evolution of so-called international broadcasters. As radio played a part in colonial politics, it also figured prominently in the politics of the post-colonial. Within the broader context of global radio, this book examines several former colonies and the transformation of radio from a tool of empire into an instrument of national development. It also focuses on instances in which developing nations have used radio to bridge the gap between rural audiences and digital networked technologies connecting them to the global information superstructure. Scholars of media studies, communication, radio studies, international relations, and political science will find this book particularly useful. **Official Gazette of the United States Patent and Trademark Office**, 2004. **Manual of Regulations and Procedures for Federal Radio Frequency Management** United States.
