Radon Measurements by Etched Track Detectors S. A. Durrani, Radomir Ilić, 1997 Exposure to radon gas which is present in the environment naturally constitutes over half the radiation dose received by the general public annually At present the most widely used method of measuring radon concentration levels throughout the world both in dwellings and in the field is by etched track detectors also known as Solid State Nuclear Detectors SSNTDs Although this is not only the most widely used method but is also the simplest and the cheapest yet there is at present no book available on the market globally devoted exclusively or largely to the methodology of and dealing with the results obtained by the SSNTD technique The present book fills this important gap in the coverage of radon measurements Individual chapters of the book are contributed by some of the most prominent and active research workers in the world in the SSNTD discipline as well as in the field of radon measurements A detailed breakdown of the contents of the book is shown below together with the names of the authors of each chapter

**Handbook of Radioactivity Analysis** Michael F. L'Annunziata, 2003-09-12 Handbook of Radioactivity Analysis describes the preparation of samples from a wide variety of matrices assists the investigator or technician in the selection and use of appropriate radiation detector and presents the latest state of the art computerized and automated methods of analysis The new Handbook of Radioactivity Analysis is suitable as a teaching text for university and professional training courses Of interest to those working in a wide spectrum of disciplines including scientists engineers physicians and technicians involved with the preparation utilization or disposal of radioactive materials and the measurement of radioactivity in the environment New expanded and updated edition with three additional chapters Provides modern procedures and guidelines for the analysis of natural and man made environmental radionuclides Includes up to date detailed sample preparation techniques for soil air plant water biological tissue filter material gels surface swipes etc Provides practical information for radioactivity monitoring spectrometric analysis and radiation dosimetry Covers state of the art high sample throughput microplate

analysis techniques and multi detector scintillation proximity analysis Presents the latest methods of rapid electronic radionuclide imaging Written by twenty five experts from eight countries Over 2 000 literature references      **Occupational Radiation Protection in the Uranium Mining and Processing Industry** IAEA,2020-06-05 This Safety Report has been developed as part of the IAEA programme on occupational radiation protection to provide for the application of its safety standards in implementing a graded approach to the protection of workers against exposures associated with uranium mining and processing The publication describes the methods of production associated with the uranium industry and provides practical information on the radiological risks to workers in the exploration mining and processing of uranium It is a compilation of detailed information on uranium mining and processing stages and techniques general radiation protection considerations in the relevant industry general methodologies applicable for control monitoring and dose assessment exposure pathways and radiation protection programmes for a range of commonly used mining and processing techniques

**Environmental Radon** Sukanya S.,Sabu Joseph,2023-05-30 This book presents state of the art techniques on radon  $^{222}\text{Rn}$  in the environment including measurement techniques in air soil and water and its potential applications to various hydrological investigations especially for water resources development and management The future directions of its use are also discussed As a radon tracer can be used to solve hydrological issues the highlights of this book are useful for stakeholders to achieve UN Sustainable Development Goal 6 which addresses the sustainability of water resources The most relevant target audiences are hydrologists hydrogeologists geologists environmental scientists nuclear physicists hydraulic engineers and academicians among others This book also covers health implications of radon and mitigation strategies thus creating a valuable resource for health physicists working on environmental radiation safety as well      **Computing and**

**Machine Learning** Jagdish Chand Bansal,Samarjeet Borah,Shahid Hussain,Said Salhi,2024-12-24 This book features high quality research papers presented at the International Conference on Computing and Machine Learning CML 2024 organized by Department of Computer Applications Sikkim Manipal Institute of Technology Sikkim Manipal University Sikkim India during April 29 30 2024 The book presents diverse range of topics including machine learning algorithms and models deep learning and neural networks computer vision and image processing natural language processing robotics and automation reinforcement learning big data analytics cloud computing internet of things human robot interaction ethical and social implications of AI applications in healthcare finance and industry computer modeling quantum computing high performance computing cognitive and parallel computing cloud computing distributed computing embedded computing human centered computing and mobile computing      **Emerging Advances in Mathematical and Physical Sciences** Anil Kumar,Rakesh

Kumar,Dilip Kumar,Sunder Singh,2020-09-14 This book consisting of three sections Mathematical Sciences Physical Sciences and Multidisciplinary Sciences It contains the articles contributed by well known researchers      WHO Handbook on Indoor Radon World Health Organization,2009 This handbook focuses on residential radon exposure from a public health point of

view and provides detailed recommendations on reducing health risks from radon and sound policy options for preventing and mitigating radon exposure The material in the handbook reflects the epidemiological evidence that indoor radon exposure is responsible for a substantial number of lung cancers in the general population Information is provided on the selection of devices to measure radon levels and on procedures for the reliable measurement of these levels Discussed also are control options for radon in new dwellings radon reduction in existing dwellings as well as assessment of the costs and benefits of different radon prevention and remedial actions Also covered are radon risk communication strategies and organization of national radon programs Publisher s description *Radon Monitoring In Radioprotection, Environmental And/or Earth Sciences - Proceedings Of The Second Workshop* Giuseppe Furlan,L Tommasino,1993-02-04 [Air Pollution, Air Quality, and Climate Change](#) Angelo Basile,Didem Saloglu,Alfredo Cassano,2024-11-25 Air Pollution Air Quality and Climate Change offers a review of the latest advances and developments in the study of air pollution and air quality in the face of continuing climate change The editors begin with a detailed review of air pollution and its sources effects and impacts In depth chapters follow on atmospheric chemistry air pollution meteorology and take a look at indoor and urban air quality The editors then explore the connection between air quality and climate change the effects of CO<sub>2</sub> on air quality and use of carbon capture and storage Finally the book closes with a discussion of environmental policy making as well as future considerations for air pollution air quality and climate change This text is a timely and valuable reference for anyone working towards solutions to reduce air pollution improve air quality and lessen the effects of climate change Helps readers understand atmospheric pollutants exposure assessment and material damage Explores the role of carbon dioxide in air pollution and its effect on air quality Provides innovative approaches new technologies and strategies to reduce air pollution and improve air quality *Mathematical Methods in Interdisciplinary Sciences* Snehashish Chakraverty,2020-06-02 Brings mathematics to bear on your real world scientific problems Mathematical Methods in Interdisciplinary Sciences provides a practical and usable framework for bringing a mathematical approach to modelling real life scientific and technological problems The collection of chapters Dr Snehashish Chakraverty has provided describe in detail how to bring mathematics statistics and computational methods to the fore to solve even the most stubborn problems involving the intersection of multiple fields of study Graduate students postgraduate students researchers and professors will all benefit significantly from the author s clear approach to applied mathematics The book covers a wide range of interdisciplinary topics in which mathematics can be brought to bear on challenging problems requiring creative solutions Subjects include Structural static and vibration problems Heat conduction and diffusion problems Fluid dynamics problems The book also covers topics as diverse as soft computing and machine intelligence It concludes with examinations of various fields of application like infectious diseases autonomous car and monotone inclusion problems **Recent Trends in Modelling of Environmental Contaminants** Debashish Sengupta,2014-06-18 The book deals primarily with the aspects like energy resources and its

proper utilization disposal of various forms of wastes and its effects and effects of major catastrophic events like nuclear disasters global warming etc It also deals with the choice of suitable disposal sites for solid and hazardous waste which is growing at an extremely rapid pace due to rapid industrialization population growth primarily in countries like India and China and urbanization In addition groundwater contamination due to various causes and its effect on the food chain is also amply discussed The book is specifically aimed with the state of art information regarding research and development in these areas of study coupled to extensive modelling and case based results obtained both from India as well as other countries The book is extremely instructive for the students research workers scientists faculty members in Applied Physics Solid Earth Geophysics Radiometric Methods and Exploration Ground Water Geochemistry Mathematical Modeling Techniques in Earth Sciences Near Surface Geophysics and Earth and Environmental Sciences **Journal of Scientific and Industrial Research** ,2011 Annali Di Geofisica ,2008 Restoration of Environments with Radioactive Residues International Atomic Energy Agency,2000 Proceedings of a symposium held in Arlington Virginia USA 29 November 3 December 1999 Radioactive residues can originate from several sources and may give rise to radiation exposure of people The purpose of the symposium was to exchange information and to generally discuss the question of whether the restoration of environments affected by radioactive residues is required and to what extent it should be performed These proceedings include all papers presented and discussions held at the symposium *High Levels of Natural Radiation*, 1996 Tsutomu Sugahara,Zufan Tao,1997 Hardbound This volume covers in addition to the topics presented at previous meetings i e world natural radiation world high level natural radiation areas environmental transfer pathways technologically enhanced natural radiation environment radon in the environment cytogenetic studies epidemiological studies and radiation measurement methods some new topics These include radioactive contamination by nuclear tests Chernobyl accident and some related biological studies methodology and quality control for low dose measurements methodology of epidemiology in low dose radiation exposure stimulatory effects of low dose radiation adaptive response and genetic effects of low dose irradiation and radiation paradigm regarding risk from exposure to low dose radiation **Atmospheric and Oceanic Optics** ,2005 **General physics, relativity, astronomy and mathematical physics and methods** ,1998 **International Books in Print** ,1986
