Raising Of Intelligence A Selected History Of Attempts To Raise Retarded Intelligence:

The Raising of Intelligence H. H. Spitz, 2013-02-01 The history of attempts to raise the intelligence of mentally retarded individuals is wrought with controversy Spanning the years from 1800 to the present this book offers a critical review of the methods and philosophy behind these efforts A fascinating contribution to the long standing debate on the malleability of intelligence and the influence of heredity and environment

The Limits of Family Influence David C. Rowe, 1994-01-01 Challenging firmly established assumptions about the influence of child rearing on the development of children's personalities and intelligence this book contends that there has been too heavy an emphasis on the family as the bearer of culture It draws from behavior genetic research to reveal how environmental variables such as social class parental warmth and one versus two parent households may be empty of causal influence on child outcomes The book examines the theoretical basis of socialization science and describes in great detail what behavior genetic studies can teach us about environmental influence

Policy Perspectives on Educational Testing Bernard R. Gifford, 2012-12-06 America faces a crisis in education and its accompanying effects on the nation's economic and social life Educators and policy makers need to document the extent of this crisis to gauge its potential impact and to develop educational strategies that would boost achievement this has turned the spotlight on educational assessment the procedures practices and tools that educators use to measure the progress of students both as individuals and groups This book deals with a range of issues within the field of educational assessment with an emphasis on those issues that have sparked the public policy debate in recent years Much of this volume concerns itself with the impact of testing on various subgroups of the population blacks Hispanics young children and children considered to be of below average ability Taken together the contributions to this volume represent a broad range of views on differential test performance This book is part of the subseries of books based on the Ford Foundation's National Commission on Testing and Public Policy Previous titles in this program include Gifford Wing Test in Defense Gifford O Connor Changing Assessments Gifford Test Policy and the Politics of Opportunity Allocation and Gifford Test Policy and Test Performance

Earning and Learning Susan E. Mayer, Paul E. Peterson, 2010-12-01 A Brookings Institution Press and Russell Sage Foundation publication Education is one of the largest sectors of the U S economy yet scholars educators policymakers and parents do not agree about what the money spent on education really buys In particular they do not agree on how much education improves children's ability to learn or whether the things children learn in school truly improve their chances for success as adults If schooling increases how much students know and what they know does pay off later then it is important to ask what schools can do to increase students learning and earning The essays in this book report estimates of the effects of learning on earnings and other life outcomes They also examine whether particular aspects of schooling such as the age at which children begin school classroom size and curriculum or structural reform such as national or statewide examinations or school choice affect learning Taken together their findings suggest that liberals are correct in

saying that more investment is needed in early education that class sizes should be further reduced and that challenging national or state standards should be established But they also provide support for conservatives who ask for a more demanding curriculum and greater school choice Contributors include John Bishop Eric Hanushek James Heckman Christopher Jencks Caroline Minter Hoxby Fred Mosteller and Christopher Winship [Project Summaries](#) ,1990 *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 [Interactive Assessment](#) H. Carl Haywood,David Tzuriel,2013-11-11 The terms interactive and dynamic would never have been associated with psychological and psychoeducational assessment a generation ago They have currency now because of widespread dissatisfaction with the normative standardized testing model criticism of theoretical concepts of intelligence recognition of abuses of standardized intelligence testing and frustration with prediction and classification as primary goals of assessment It is almost certainly true that public policy concerns propel scientific activity far more often than science propels public policy In the case of psychological assessment public policy concerns have arisen in the last 20 years primarily around issues of possible discrimination against members of ethnic minorities At the same time there has been a re surge of dedication to excellence in education goals These concerns have led to such extreme measures as prohibition of the use of standardized intelligence tests to determine school placement decisions especially for minority children They have led also to a search for alternatives to standardized normative testing The chapters in this volume represent a variety of answers to this need
