Supermajority Voting in Constitutional Courts Cristóbal Caviedes, 2024-08-02 This book challenges the

wide use of majority rule in many constitutional courts for declaring statutes unconstitutional and argues that these courts should rather perform constitutional review by using supermajority rules. Considering that constitutional courts often tackle hard moral issues, it is questionable whether a bare majority of judges should suffice for settling them, especially considering these courts' counter-majoritarian nature. Further, the wide use of majority rule for checking the constitutionality of legislation may increasingly risk their reputation. Such a concern is developing in the United States following a series of Supreme Court decisions. This book argues that majority rule is unjustified in constitutional review. This means that in constitutional review, considering majority rule's traits, there are no decisive reasons for using this voting rule over other voting rules. Additionally, the book argues that when checking the constitutionality of legislation, constitutional courts should replace majority rule with supermajority rules. Thus, for declaring statutes unconstitutional, it is argued that more than 50% of the judges present plus one judge present should be needed. This book will be of interest to academics, researchers, and policy makers working in the areas of Constitutional Law and Politics.

Sustainable Development in East Asia Countries Tao Yitao, Yuan

Yiming, 2017-05-01 **A Philosophy of Evidence Law** H. L. Ho, 2008-03-06 The dominant approach to evaluating the law on evidence and proof focuses on how the trial system should be structured to guard against error. This book argues instead that complex and intertwining moral and epistemic considerations come into view when departing from the standpoint of a detached observer and taking the perspective of the person responsible for making findings of fact. Ho contends that it is only by exploring the nature and content of deliberative responsibility that the role and purpose of much of the law can be fully understood. In many cases, values other than truth have to be respected, not simply as side constraints but as values which are internal to the nature and purpose of the trial. A party does not merely have a right that the substantive law be correctly applied to objectively true findings of fact and a right to have the case tried under rationally structured rules. The party has more broadly a right to a just verdict where justice must be understood to incorporate a moral evaluation of the process which led to the outcome. Ho argues that there is an important sense in which truth and justice are not opposing considerations; rather, principles of one kind reinforce demands of the other. This book argues that the court must not only find the truth to do justice; it must do justice in finding the truth.

 issues relevant to school admissions arising from three different approaches adopted in this period planning via local
 authorities quasi market mechanisms and random allocation Each approach is assessed on its own terms but constitutional

 schooling especially democratic expectations associated with citizenship Repeated failure to identify and pursue specific
 values for schooling and hence admissions can be found to underlie questions regarding the fairness of the process while also
 limiting the potential utility of judicial responses to legal actions relating to school admissions The book adopts an
