Alarming! The Chasm Separating Basic Statistics Education from its Necessities William J. Adams, 2013-05-20
The fairly large sample of current basic statistics books I gave thought to recently may in my view be characterized as number pushers with a large number of illustrations intended to convey a sense of the importance of statistics to the study of real world problems. What's wrong with that? Nothing provided that what I submit to be the necessities of statistics education are given the attention they warrant are not smothered by glitzy overwhelming attention to number pushing. Do not receive short shrift or are not mentioned at all. Am I being too critical? I invite you to give thought to fifteen issues/questions that are the core of the aforementioned chasm and render your verdict. Food for thought in support of the issues/questions raised along with answers/discussion are included. Many students and those who apply statistics to their fields of interest subscribe to the view that to apply statistics to a problem situation all you need do is throw your data into a computer and let it do its thing. The further they travel along this road of thought the more we can expect misunderstanding of statistics and when it comes to publication statistical junk. I believe that the only way to change the direction of this road of thought is to incorporate into our teaching of basic statistics what is feasible of the necessities of statistics education. For further discussion of the necessities of basic statistics education I recommend the book I coauthored with my colleagues Irwin Kabus and Mitchell Preiss *Statistics: Basic Principles and Applications* 2nd ed Kendall Hunt Publishing Co 2000 or the revised 2nd ed W J Adams Xlibris 2009.

Secrets of an Organized Mom Barbara Reich, 2014-04
Everyone should. Barbara Fey raves. The New York Times. A life-changing program for streamlining everything that's weighing you down from over-stuffed closets to overwhelming social calendars courtesy of the media. So go to organizing guru Barbara Reich. Mothers can feel like life is one never-ending loop. Just when one problem or responsibility is handled another one trips us up. But help is on the way. Barbara Reich has all the strategies necessary for staying ahead of the curve and she's wrapped them up into four easy steps that can be applied to any organizing project. The keys to Barbara's success are simplicity and consistency. Room by room she takes readers through the most problematic areas in the home from the tornado-struck play area to the over-stuffed basement or storage unit. Barbara shows readers how to approach organizing in manageable bites, many of which can be dealt with in two hours or less. With each organizing project she teaches readers how to apply the four steps: 1. purge, 2. design, 3. organize, and 4. maintain. And she also reveals how to solve organizing problems that may pop up in the future from knowing when and how to keep financial papers to how to digitally organize the family's photographs. As the mother of twelve-year-old twins, Barbara offers tips for crazed moms as only a mother could. Combining the humor of a sympathetic friend and the no-nonsense advice of a true type-A personality, Reich offers clever, appealing solutions that are genuinely achievable for everyone.
