Winsor,2013-11-05 Comprised of a study spanning over five years this text looks at four engineering co op students as they write at work Since the contributors have a foot in both worlds work and school the book should appeal to people who are interested in how students learn to write as well as people who are interested in what writing at work is like Primarily concerned with whether engineers see their writing as rhetorical or persuasive the study attempts to describe the students changing understanding of what it is they do when they write Two features of engineering practice that have particular impact on the extent to which engineers recognize persuasion are identified a reverence for data and the hierarchical structure of the organizations in which engineering is most commonly done Both of these features discourage an open recognition of persuasion Finally the study shows that the four co op students learned most of what they knew about writing at work by engaging in situated practice in the workplace rather than by attending formal classes   **SWE** ,2003   *Understanding Lasers* Jeff Hecht,1992 This updated edition is both accurate and easy to understand Written for students hobbyists non specialist engineers and anyone who wants an entry level introduction to laser technology this book provides practical intuitive descriptions of the workings of major types of lasers and their applications Key topics include semiconductor lasers solid state lasers gas lasers laser applications in information processing medicine communications industry and military systems Clear succinct and amply illustrated this book makes an

Citrin,Richard

Smith,2003-08-05 What is different about the careers of people like Lou Gerstner the acclaimed recently retired chairman and CEO of IBM Or Senator Elizabeth Dole Yahoo COO Dan Rosensweig and Tom Freston chairman and CEO of MTV Networks Why did they ascend to the top and prosper why did they have extraordinary careers while others equally talented never reached their potential or aspirations Jim Citrin and Rick Smith of Spencer Stuart the world s most influential executive search firm set out to explore this question The result based on in depth original research is sure to be the most important and useful book for anyone seeking to crack the code of how to build a rewarding personally satisfying career Like weather systems and financial markets careers contain patterns What Citrin and Smith found from their research and extensive experience is that people with extraordinary careers are guided by five straightforward patterns that can be harnessed and used by everyone These individuals Understand the value of you by translating their knowledge and experience into action building their personal value over each phase of their career Practice benevolent leadership by not clawing their way to the top but by being carried there Solve the permission paradox the dilemma of not being able to get a job without experience and not getting the experience without the job Differentiate using the 20 80 principle of performance by storming past their defined jobs to create breakthrough ideas and deliver unexpected impact Do not micromanage their careers but macromanage them by gravitating toward the things they are best at and have a passion for and working with people they like and respect No one manages your career for you But with Citrin and Smith as your guide you ll be able to understand and act on the root causes of success And what better source for strategic career advice than Spencer Stuart the firm that over the past ten years has conducted more than 60 percent of the searches for Fortune 1000 CEOs
