## **Real Self A Developmental Self And Object Relations Approach:**

The Real Self James F. Masterson, M.D., 2013-08-21 First Published in 1985 This informative volume examines the clinical research linking normal separation individuation with object relations theory and developmental psychopathology It focuses on the core problem the lack of a concept of the self integrated with object relations theory By adding a theory of the self to object relations theory the book both enlarges and more acutely focuses the therapeutic perspective thereby enhancing work with patients It also further enables therapists to clarify their own real selves Dr Masterson's thesis is that for the real self to finally emerge from the symbiotic union and assume its full capacities identification acknowledgment and support are required from the mother and father in early development and from the therapist in psychotherapy Dr Masterson describes and illustrates the therapeutic technique of communicative matching and provides the necessary acknowledgment while maintaining therapeutic neutrality Part I reviews psychoanalytic theory of the ego and the emerging real self its structure function development and its psychopathology and treatment Part II explores the relationship between maternal libidinal acknowledgment and the development of the real self by a cross cultural comparison of child raising in Japan Israel and the United States It then describes the influence of social and cultural factors on the functioning of the real self in the United States Part III on Creativity and the Real Self draws upon fairy tales Jean Paul Sartre Edvard Munch and the life and work of the novelist Thomas Wolfe to show how for some artists creativity becomes a crucial vehicle in their search to establish a real self This section illuminates the nature of personal and artistic creativity and describes how a professional interest in the functioning of the real self leads inevitably to an interest in the ultimate of self expression creativity Of special interest are the numerous case illustrations drawn from Masterson's extensive clinical work showing how acknowledgment and support enable the real self to fully emerge from the symbiotic union and to assume its full capacities

**Transpersonal Psychology in Psychoanalytic Perspective** Michael Washburn, 1994-07-01 In this book Michael Washburn provides a psychoanalytic foundation for transpersonal psychology Using psychoanalytic theory Washburn

explains how ego development both prepares for and creates obstacles to ego transcendence Spiritual development he proposes can be properly understood only in terms of the ego development that precedes it For example many difficulties encountered in spiritual development can be traced to repressive underpinnings of ego development and significant gender differences in spiritual development can be traced to corresponding gender differences that emerge during ego development Washburn draws on a wide range of psychoanalytic perspectives in discussing ego development and uses both Eastern and Western sources in discussing spiritual development In rethinking transpersonal psychology in psychoanalytic terms he explains how essential elements of Jungian thought can be grounded in psychoanalytic theory      **Self-in-Relationship**

*The Klein-Winnicott Dialectic* Susan Kavalier-Adler,2018-05-01 The Klein Winnicott Dialectic Transformative New Metapsychology and Interactive Clinical Theory brings together the theories of Melanie Klein and Donald W Winnicott two giants and geniuses of the British school of object relations clinical and developmental theory and psychoanalytic technique In this book The author attempts to integrate the theories of Klein and Winnicott rather than polarising them as has been done often in the past This book takes the best of Klein and Winnicott for use by clinicians on an everyday basis without having the disputes between their followers interfere with the full and rich platter of theoretical offerings they each of them provided In addition this book looks at the biographies of Klein and Winnicott to show how their theories were inspired by their contrasting lives and contrasting parenting and developmental dynamics By examining their theories in relation to their biographies one can see why their dialectical theoretical focuses emerged highly contrasted in their major emphasis and yet highly complementary when applied together to clinical work

*Culture And Self* Douglas B. Allen, 2018-02-02 Traditional scholars of philosophy and religion both East and West often place a major emphasis on analyzing the nature of the self In recent decades there has been a renewed interest in analyzing self but most scholars have not claimed knowledge of an ahistorical objective essential self free from all cultural determinants The contributors of this volume recognize the need to contextualize specific views of self and to analyze such views in terms of the dynamic

dialectical relations between self and culture An unusual feature of this book is that all of the chapters not only focus on traditions and individuals East and West but include as primary emphases comparative philosophy religion and culture reinforcing individual and cultural creativity Each chapter brings specific Eastern and Western perspectives into a dynamic comparative relation This comparative orientation emphasizes our growing sense of interrelatedness and interdependency
