Pickering, 2002-03-11 Durkheim's sociological thought is based on the premise that the world cannot be known as a thing in itself but only through representations rough approximations of the world created either individually or collectively This set of papers by leading Durkheimians from Britain America and continental Europe is the first concentrated attempt to understand what he meant by representations how his understanding of the term was influenced by Kant and by neo Kantians like Charles Renouvier and how his use of the concept in his work developed over time By arguing that his use of representations at the core of Durkheim's sociological thought this book makes a unique contribution to Durkheimian studies which have recently been dominated by positivist and functionalist interpretations and reveals a thinker very much in tune with contemporary developments in philosophy linguistics and sociology *Reality, Representation, and Projection* John Haldane, Crispin Wright, 1993 *Reality Representation and Projection* is an important collection of new essays on a range of topics relating to realism and its rivals in metaphysics logic metaethics and epistemology The contributors are some of the leading authors in these fields including the late Ian McFetridge Mark Johnston John Skorupski Christopher Peacocke Michael Williams Edward Craig Michael Smith John Campbell Peter Railton David Wiggins Bob Hale Simon Blackburn John Haldane and Crispin Wright Several of the essays constitute definitive statements of their views In some cases authors write in response to the essays of other contributors while in other cases they proceed independently Although not primarily historical this collection includes discussions of philosophers from the Middle Ages to the present day from Aquinas to Wittgenstein No one seriously interested in questions about realism whether as a general philosophical outlook or as a particular position within specific debates can afford to be without this collection *Representation and Reality* Hilary Putnam, 1988 The author one of the first philosophers to advance the notion that the computer is an apt model for the mind takes a radical view of his own theory of functionalism in this book *Reality as Representation* Emanuela Casti, 2000 **A Mathematical Model For Physical Representation and Conflict Identification in Virtual Reality Architecture**, **The reality of film** Richard Rushton, 2013-07-19 In formulating a notion of filmic reality *The Reality of Film* offers a novel way of understanding our relationship to cinema It argues that cinema need not be understood in terms of its capacities to refer to reproduce or represent reality but should be understood in terms of the kinds of realities it has the ability to create *The Reality of Film* investigates filmic reality by way of six key film theorists Andr Bazin Christian Metz Stanley Cavell Gilles Deleuze Slavoj Žižek

and Jacques Rancière In doing so it provides comprehensive introductions to each of these thinkers while also debunking many myths and misconceptions about them Along the way a notion of filmic reality is formed that radically reconfigures our understanding of cinema This book is essential reading for film scholars students and philosophers of film while it will also appeal to graduate students and specialists in other fields

*Naturalism and Our Knowledge of Reality* R. Scott Smith, 2016-04-22 Philosophical naturalism is taken to be the preferred and reigning epistemology and metaphysics that underwrites many ideas and knowledge claims But what if we cannot know reality on that basis What if the institution of science is threatened by its reliance on naturalism R Scott Smith argues in a fresh way that we cannot know reality on the basis of naturalism Moreover the fact value split has failed to serve our interests of wanting to know reality The author provocatively argues that since we can know reality it must be due to a non naturalistic ontology best explained by the fact that human knowers are made and designed by God The book offers fresh implications for the testing of religious truth claims science ethics education and public policy Consequently naturalism and the fact value split are shown to be false and Christian theism is shown to be true
