Martin Fransman, 2002 The telecoms industry is one of the most important in the global economy Without it the Internet and Information Society would not exist But how does it work How has it been changed by the Internet Why was 2 500 billion wiped off its stock market value in 2000 1 How have its incumbent operators such as AT&T BT Deutsche Telekom France Telecom and NTT and their aggressive rivals for example WorldCom Qwest and COLT adjusted to the radical changes sweeping the industry Why has Japan succeeded but Europe failed in creating the latest incarnation of the industry the mobile Internet These are some of the key questions analysed The book begins with an explanation of the telecoms boom and bust 1996 2002 It tackles the questions regarding who was to blame and why and also examines the consequences of the bust An analytical framework is created to understand the main forces driving the telecoms industry as it is transformed by the Internet into the infocommunications industry It is shown that knowledge in its various manifestations and changes in knowledge are responsible for the key changes that have taken place The foundation of the infocommunications industry comprises a combination of specialist technology suppliers such as Cisco Nokia NEC and Nortel and network operators Their changing relationship lies at the heart of the forces driving the industry The author looks at how these changes have affected the struggles of the incumbent network operators and their new entrant rivals He also analyses some of the main new entrepreneurs in the industry looking at why they managed to enter so successfully what has become of them and why The continuing changes in the knowledge base of the industry are examined as are some of the latest developments in the mobile Internet Finally the future of the industry is confronted The book is complemented by the interactive web site www.TelecomVisions.com
