Wisdom and Destiny Maurice Maeterlinck,2015-12-31 INTRODUCTION This essay on Wisdom and Destiny was to have been a thing of some twenty pages the work of a fortnight but the idea took root others flocked to it and the volume has occupied M Maeterlinck continuously for more than two years It has much essential kinship with the Treasure of the Humble though it differs therefrom in treatment for whereas the earlier work might perhaps be described as the eager speculation of a poet athirst for beauty we have here rather the endeavour of an earnest thinker to discover the abode of truth And if the result of his thought be that truth and happiness are one this was by no means the object wherewith he set forth Here he is no longer content with exquisite visions alluring or haunting images he probes into the soul of man and lays bare all his joys and his sorrows It is as though he had forsaken the canals he loves so well the green calm motionless canals that faithfully mirror the silent trees and moss covered roofs and had adventured boldly unhesitatingly on the broad river of life He describes this book himself in a kind of introduction that is almost an apology as a few interrupted thoughts that entwine themselves with more or less system around two or three subjects He declares that there is nothing it undertakes to prove that there are none whose mission it is to convince And so true is this so absolutely honest and sincere is the writer that he does not shrink from attacking qualifying modifying his own propositions from advancing and insisting on every objection that flits across his brain and if such proposition survive the onslaught of its adversaries it is only because in the deepest of him he holds it for absolute truth For this book is indeed a confession a naive outspoken unflinching description of all that passes in his mind and even those who like not his theories still must admit that this mind is strangely beautiful There have been many columns filled and doubtless will be again with ingenious and scholarly attempts to place a definitive label on M Maeterlinck and his talent to trace his thoughts to their origin clearly denoting the authors by whom he has been influenced in a measure to predict his future and accurately to establish the place that he fills in the hierarchy of genius With all this I feel that I have no concern Such speculations doubtless have their use and serve their purpose I shall be content if I can impress upon those who may read these lines that in this book the man is himself of untrammelled thought a man possessed of the rare faculty of seeing beauty in all things and above all in truth of the still rarer faculty of loving all things and above all life

How to Fix Exploding Brains? Ram Arora,2009-11-11 All living organisms are like biological robots Their physical actions organic capabilities and senses are firmly and very narrowly limited and so programmed in the DNA Brain the master controller of the living system is as susceptible to external and internal stresses as all other bodily components The brain is also abode of the mind and the mind is the embodiment of thoughts The scientific observation that brain and mind die simultaneously is irrefutable Wherein the brain the mind parks itself is a mystery The brain is more intricate than

the universe and the mind exceeds the brain in complexity Billions of neurons and trillions of synapses keep on firing acting reacting storing and communicating to and from sensory organs as long as the structure of the brain is not damaged diseased or dead Brain when overloaded with its electric charge due to intense mental activity can explode like a bomb Five people are known to have died when their brains blew up because of the condition called Hyper Cerebral Electrosis HCE The most recent death occurred when psychic Barbara Nicole s skull burst Chess Champion Nikolai Titov s head suddenly blew apart when he was concentrating on his move The brain endures many mini explosions without shattering HCE kills rarely but sickens very often All evil emotions cause stronger HCE than pleasant thoughts do
