Instruction: A practitioner's handbook Kurt Engelmann,2024-04-05 Direct Instruction DI is a powerful instructional approach designed to ensure that students master critical skills and content required for more advanced learning Although DI has existed since the late 1960s there are many common misconceptions about the approach its potential to enhance student learning and the way its proper implementation facilitates students academic success This book provides a systematic explanation of the Direct Instruction methodology and DI program design as it outlines a roadmap for teachers and school leaders on how to implement DI successfully Divided into three main sections the first section describes DI as a coherent and complete teaching and learning system that contrasts DI with lower case di or explicit instruction which focuses on effective instructional delivery techniques The second section provides a step by step guide to implementing DI The third section is devoted to cautions about implementing DI This section reinforces the notion that the physical possession of the DI curricula does not by itself lead to student success Those who adopt DI need to ensure that it is implemented with fidelity for the benefit of their students who are reliant on them to provide them with the means to achieve their academic potential so they may lead healthy productive lives **Goal Writing for the Speech-Language Pathologist and Special Educator**

Written for all teachers as well as administrators, this resource covers strategies for nine essential components of effective reading instruction: phonemic awareness, phonics, spelling, fluency, developing a reading culture, providing opportunities to read, writing, word knowledge, and comprehension. IEP Goal Writing for Speech-Language Pathologists Lydia Kopel, Elissa Kilduff, 2020-06-15. IEP Goal Writing for Speech Language Pathologists Utilizing State Standards Second Edition familiarizes the speech language pathologist (SLP) with specific Early Learning Standards (ELS) and Common Core State Standards (CCSS) as well as the speech language skills necessary for students to be successful with the school curriculum. It also describes how to write defensible Individualized Education Plan (IEP) goals that are related to the ELS and CCSS. SLPs work through a set of steps to determine a student's speech language needs. First an SLP needs to determine what speech language skills are necessary for mastery of specific standards. Then the SLP determines what prerequisite skills are involved for each targeted speech language skill. Finally there is a determination of which steps to mastery need to be followed. It is through this process that an SLP and team of professionals can appropriately develop interventions and an effective IEP. The text takes an in depth look at the following speech language areas: vocabulary, questions, narrative skills, summarize, compare and contrast, main idea and details, critical thinking, pragmatics, syntax and morphology, and articulation and phonological processes. These areas were selected because they are

the most commonly addressed skills of intervention for students aged 3 to 21 with all levels of functioning For each listed area the text analyzes the prerequisite skills and the corresponding Steps to Mastery It provides a unique step by step process for transforming the Steps to Mastery into defensible IEP goals The key is to remember that the goal must be understandable doable measurable and achievable This text provides clear guidelines of quantifiable building blocks to achieve specific goals defined by the student s IEP School based SLPs are instrumental in helping students develop speech and language skills essential for mastery of the curriculum and standards All SLPs working with school aged children in public schools private practice or outpatient clinics will benefit from the information in this text New to the Second Edition Ten Speech and Language Checklists for determining speech and language needs of an individual 3 21 years of age as well as measuring progress Material on measuring progress including five performance updates Goal writing case studies for four students of different ages and skill levels A thoroughly updated chapter on writing goals with up to date examples Revised Prerequisite Skills and Steps to Mastery to reflect the current state of research Expanded focus on evidence based practice Disclaimer Please note that ancillary content such as documents audio and video etc may not be included as published in the original print version of this book
