D. W. Nandalal,Janos J. Bogardi,2007-05-10 Dynamic programming is a method of solving multi stage problems in which decisions at one stage become the conditions governing the succeeding stages It can be applied to the management of water reservoirs allowing them to be operated more efficiently This is one of the few books dedicated solely to dynamic programming techniques used in reservoir management It presents the applicability of these techniques and their limits on the operational analysis of reservoir systems The dynamic programming models presented in this book have been applied to reservoir systems all over the world helping the reader to appreciate the applicability and limits of these models The book also includes a model for the operation of a reservoir during an emergency situation This volume will be a valuable reference to researchers in hydrology water resources and engineering as well as professionals in reservoir management Control Applications of Nonlinear Programming and Optimization G. Di Pillo,2014-05-17 Control Applications of Nonlinear Programming and Optimization presents the proceedings of the Fifth IFAC Workshop held in Capri Italy on June 11 14 1985 The book covers various aspects of the optimization of control systems and of the numerical solution of optimization problems The text also discusses specific applications concerned with the optimization of aircraft trajectories of mineral and metallurgical processes of wind tunnels and of nuclear reactors The book also considers computer aided design of control systems The book is useful to mathematicians engineers and computer engineers Integer Programming and Related Areas R.v.
