Binocular Vision and Stereopsis Ian P. Howard,Brian J. Rogers,1995 This book is a survey of knowledge about binocular vision with an emphasis on its role in the perception of a three dimensional world The primary interest is biological vision In each chapter physiological behavioral and computational approaches are reviewed in some detail discussed and interrelated The authors describe experiments required to answer specific questions and relates them to

new terminologies and current theoretical schemes *Research Awards Index* ,1989 Behavioral Methods in Consciousness Research Morten Overgaard,2015-03-26 The past two decades have seen a surge of interest in the topic of consciousness with the result that the research literature has expanded greatly However until now there has been little consensus on just which methods are the most effective for the study of consciousness As a result a wide range of experimental paradigms have been employed sometimes making it difficult to compare and contrast experimental findings Behavioral Methods in Consciousness Research is the first book of its kind providing an overview of methods and approaches for studying consciousness The chapters are written by leading researchers and experts who describe the methods they actually use in their own studies along with their pitfalls problems and difficulties For all students and researchers embarking on research in this area and even seasoned researchers this book is a valuable source of information in helping them design perform and analyze scientifically rigorous experiments
