Researching Education David Scott, Robin Usher, 2010-12-16 This book examines the philosophical historical political and social contexts of research and the implications of these for the collection and analysis of data *Researching Education* David Scott, Robin Usher, 2010-07-15 This volume is a study of the theory and practice of researching education It examines the philosophical historical political and social contexts of researching and the implications of these for the collection and analysis of data The authors argue that power is ever present in the construction of research texts and this is inevitable as research imposes a closure of the world through representation and thus is always involved with and implicated in the operation of power The book addresses such fundamental questions as What is legitimate knowledge What is the relationship between the collection and analysis of data and How does the researcher's presence in the field affect his or her data Divided into three sections the book reviews the philosophy of research the strategies and methods of research and the issues involved in research The authors present the reader with a balance of theory and practice providing case studies examples and tables to support and illustrate their arguments **Researching Education** David Scott, 2003

Researching Education David Scott, Robin Usher, 1999 This volume is a study of the theory and practice of researching education It examines the philosophical historical political and social contexts of researching and the implications of these for the collection and analysis of data The authors argue that power is ever present in the construction of research texts and this is inevitable as research imposes a closure of the world through representation and thus is always involved with and implicated in the operation of power PERSONAL COPY: Researching Education: Data Methods and Theory in Educational Enquiry David and Usher Scott (Robin), 2011 **Research Methods in Educational Leadership and Management** Ann R J Briggs, Marlene Morrison, Marianne Coleman, 2012-07-06 The essential guide to research in educational leadership and management substantially revised and updated Doing Research in Education Ioanna Palaologou, David Needham, Trevor Male, 2015-11-04 This book will help you to plan design and conduct quality research within the specific context of education and educational studies An impressive cast of contributors discuss the reality of conducting research in different educational settings and provide practical advice for both undergraduate and postgraduate students and early career researchers doing research in education The book discusses key philosophical issues such as understanding research paradigms ethics and selecting appropriate methodologies but remains grounded in the practical experience of the researcher It has comprehensive coverage of the whole research process from start to finish is easy to navigate and helps develop key skills such as Time management Creating good research questions and hypotheses Constructing the literature review Structuring a project Writing a proposal Managing data Analysing data Writing for specific audiences Packed full of learning features and showcasing a wide range of voices and opinions this book is an ideal guide for anyone conducting research in education or educational studies **Quantitative Methods in Educational Research** Stephen Gorard, 2010-07-01 This is a

comprehensive guide to quantitative research rooted in the author's own teaching and research. In particular, it challenges both the student who does not do numbers and the student who does nothing but numbers and who therefore fails to interpret or challenge his/her results. The book shows how all educational researchers need to do quantitative research even if only in the sense of reading other people's research findings. In fact, the book argues that the conventional distinction between primary and secondary research data is inadequate since there is enormous need/opportunity for conducting research through using and reinterpreting secondary data. This leads to one of the main selling points of the book: Gorard's idea of the idle researcher who makes valuable contributions to the research literature by using data gathered by other researchers.

Insider Research on Migration and Mobility Lejla Voloder, Liudmila Kirpitchenko, 2016-05-23. With an increasing proportion of migration and mobility field studies being conducted by migrants and members of ethnic minorities in home contexts, the implications of insider research are increasingly subject to critical scrutiny. Researchers who may share migration experiences or cultural, ethnic, linguistic, or religious identities with their participants are exploring the means, ethics, and politics of mobilizing insider capital for the purpose of gaining access to and representing research participants. Bringing together the latest international scholarship in the sociology and anthropology of migration, this volume explores the complexities, joys, and frustrations of conducting insider research. The book offers analyses of key methodological, ethical, and epistemological challenges faced by migration researchers as they question the ways in which they come to identify with their research topic or their participants. Addressing questions of identity and categorization, ethics, and methodology, epistemology, and situated knowledge, *Insider Research on Migration and Mobility* will appeal to scholars across the social sciences with interests in migration, mobilities, diaspora studies, and ethnic and racial identities, as well as those interested in qualitative research design and analysis.

Key Ideas in Educational Research David Scott, Marlene Morrison, 2007-07-15. 120 essays give definitions, use, and references for educational research terms.
