Resilient Children Diane M. Barone, 1999 This book defines and examines assumptions about children who were prenatally exposed to crack cocaine and who have other risk factors that may negatively affect their literacy development It suggests the 26 children in the study disproved the labels attached to them they were inquisitive about learning and in most cases were at grade level or above in literacy development Realization of the importance of overcoming the risk factors and celebrating children s growth as readers and writers were factors contributing to the children s success Chapters include The Beginning of the Study What We Have Learned About Children Prenatally Exposed to Crack Cocaine Discovering Resilience The Structure and Results of the Study Six additional chapters present case studies of individual students The last chapter discusses why these children s stories are important Contains 191 references a table Summaries of Literacy Development Year 1 Through Year 4 is attached EF Resources in Education ,2000-04 **Teaching Early Literacy** Diane M.
