Resolution Methods for the Decision Problem C. Fermüller, 1993-07-29 This volume contains work on the decision problem done in Kazan Russia Tallinn Estonia and Vienna Austria The authors met several times to discuss and exchange their results and finally decided to write this monograph together Besides a unified treatment of previously published results there are many new results first presented in this volume The monograph opens with an introduction and a chapter on terminology followed by chapters on Semantic clash resolution as decision procedure Completeness of ordering refinements Semantic tree based resolution variants Deciding the class K by an ordering refinement A resolution based method for building finite models A final chapter on applications completes the volume Conceptual Structures: Current Practices William M. Tepfenhart, Judith P. Dick, John F. Sowa, 1994-07-27 This book is the proceedings of the Second International Conference on Conceptual Structures ICCS 94 held at College Park Maryland USA in August 1994 This proceedings presents on an international scale up to the minute research results on theoretical and applicational aspects of conceptual graphs particularly on the use of contexts in knowledge representation The concept of contexts is highly important for all kinds of knowledge intensive systems The book is organized into sections on natural language understanding rational problem solving conceptual graph theory contexts and canons and data modeling Algorithms - ESA '93 Thomas Lengauer, 1993-09-21 Symposium on Algorithms ESA 93 held in Bad Honnef near Bonn in Germany September 30 October 2 1993 The symposium is intended to launch an annual series of international conferences held in early fall covering the field of algorithms Within the scope of the symposium lies all research on algorithms theoretical as well as applied that is carried out in the fields of computer science and discrete applied mathematics The symposium aims to cater to both of these research communities and to intensify the exchange between them The volume contains 35 contributed papers selected from 101 proposals submitted in response to the call for papers as well as three invited lectures Evolution of an algorithm by Michael Paterson Complexity of disjoint paths problems in planar graphs by Alexander Schrijver and Sequence comparison and statistical significance in molecular biology by Michael S Waterman *Grammatical Inference and Applications* Rafael C. Carrasco, Jose Oncina, 1994-09-07 This volume presents the proceedings of the Second International Colloquium on Grammatical Inference ICGI 94 held in Alicante Spain in September 1994 Besides 25 research papers carefully selected and refereed by the program committee the book contains a survey by E Vidal The book is devoted to all those aspects of automatic learning that explicitly focus on principles theory and applications of grammars and languages The papers are organized in sections on formal aspects language modelling and linguistic applications stochastic approaches applications and performance analysis and neural networks genetic algorithms and artificial intelligence techniques **Logics in Artificial Intelligence** Craig MacNish, David Pearce, Luis M. Pereira, 1994-08-10 This book constitutes the proceedings of the 1994 European Workshop on Logics in Artificial Intelligence held at York UK in September 1994 The 24 papers presented were selected from a total of 79

submissions in addition there are two abstracts of invited talks and one full paper of the invited presentation by Georg Gottlob The papers point out that with the depth and maturity of formalisms and methodologies available in AI today logics provide a formal basis for the study of the whole field of AI The volume offers sections on nonmonotonic reasoning automated reasoning logic programming knowledge representation and belief revision *Functional Programming, Concurrency, Simulation and Automated Reasoning* Peter E. Lauer, 1993-06-16 This collection of papers arose from a series of lectures for workers in computer science and other disciplines The lectures were intended to familiarize them with some of the most exciting advanced computer based systems for the conceptualization design implementation simulation and logical analysis of applications in these disciplines The collection presents some strong motivational points for the use of theory based systems in the areas of functional programming concurrency simulation and automated reasoning highlighting some of their advantages and disadvantages relative to conventional systems The papers are mostly the work of individuals who were among the originators of the systems presented The volume is intended as a contribution to narrowing the learning gap facing conventional computer users when they wish to use advanced theory based systems The papers are meant for a wide audience and should not require great mathematical sophistication for their comprehension The papers contain numerous references for those wishing to pursue a topic in greater depth Design and Implementation of Symbolic Computation Systems Alfonso Miola, 1993-09-02 This volume constitutes the proceedings of the International Symposium on Design and Implementation of Symbolic Computation Systems DISCO 93 held in Gmunden Austria in September 1993 The growing importance of systems for symbolic computation has greatly influenced the decision of organizing this third conference in the series DISCO 93 focuses mainly on the most innovative methodological and technological aspects of the design and implementation of hardware and software systems for symbolic and algebraic computation automated reasoning geometric modeling and computation and automatic programming The general objective of DISCO 93 is to present an up to date view of the field and to serve as a forum in symbolic computation for the scientific exchange among academic industrial and user communities Besides invited talks by Buchberger Monagan Omodeo and Hong the volume contains 28 contributions carefully selected by a highly competent international program committee from a total of 56 submissions Logic Programming and Automated Reasoning Andrei Voronkov, 1993-06-29 LPAR is an international conference series aimed at bringing together researchers interested in logic programming and automated reasoning The research in logic programming grew out of the research in automated reasoning in the early 1970s Later the implementation techniques known from logic programming were used in implementing theorem proving systems Results from both fields applied to deductive databases This volume contains the proceedings of LPAR 93 which was organized by the Russian Association for Logic Programming The volume contains 35 contributed papers selected from 84 submissions together with an invited paper by Peter Wegner entitled Reasoning versus modeling in computer science Program Development by Specification and Transformation Berthold

Hoffmann, Bernd Krieg-Brückner, 1993-08-30 This volume gives a coherent presentation of the outcome of the project PROSPECTRA PROgram development by SPECification and TRAnsformation that aims to provide a rigorous methodology for developing correct software and a comprehensive support system The results are substantial a theoretically well founded methodology covering the whole development cycle a very high level specification and transformation language family allowing meta program development and formalization of the development process itself and a prototype development system supporting structure editing incremental static semantic checking interactive context sensitive transformation and verification development of transformation meta programs version management and so on with an initial library of specifications and a sizeable collection of implemented transformations The intended audience for this documentation is the academic community working in this and related areas and those members of the industrial community interested in the use of formal methods
