Enforcing International Law Math Noortmann,2016-04-29 Until recently the fundamental link between two basic concepts in international law namely the right to self help and the obligation to settle disputes by peaceful means has been neglected in doctrine and practice The main issue is that international law traditionally recognizes the right of states to safeguard their own rights by resorting to countermeasures as well as the obligation to settle their disputes by accepted and recognized diplomatic and judicial procedures Both concepts are based on their own merits which are assumed to be valid in

Communitarian Foreign Policy Nikolas K. Gvosdev, 2017-07-05 This volume establishes Amitai Etzioni s communitarian approach to international relations as a distinct school of American foreign policy thought Nikolas K Gvosdev systematically evaluates Etzioni s ideas tracing their origins during the Cold War and their relevance to current challenges in Asia and the Middle East and considering their strengths and weaknesses Etzioni agrees with liberal internationalists who believe that traditional notions of state sovereignty are eroding and that a new set of global norms is required However he argues against the imposition of Western policies on the rest of the world which he sees as a recipe for conflict which the United States cannot afford He warns against the post Cold War triumphalism arguing that it undercuts efforts to find necessary common ground with both Russia and China An enduring and stable global architecture cannot be maintained unless it appeals to the interests of a broad community of nations The trust that is needed for forming closer associations between nations and to have a productive dialogue on human rights can only come about through the voluntary coordination of states forced to combat an increasing array of transnational threats
