Restructuring And Functional Heads:

Restructuring and Functional Heads Guglielmo Cinque, 2006-02-02 This volume collects the recent published articles of Guglielmo Cinque of the University of Venice one of the world's top linguists The book is divided into two sections the first on restructuring a central topic in Romance syntax and with connections to other language groups as well The second part focuses on the consequences of treating clausal functional heads as members of a universal hierarchy in the domain of morphosyntax offering a new perspective on many intricate problems arising in a variety of natural languages

Restructuring and Functional Heads: The Cartography of Syntactic Structures Volume 4 Guglielmo Cinque, 2006-02-02 This volume collects the recent published articles of Guglielmo Cinque of the University of Venice one of the world's top linguists The book is divided into two sections the first on restructuring a central topic in Romance syntax and with connections to other language groups as well The second part focuses on the consequences of treating clausal functional heads as members of a universal hierarchy in the domain of morphosyntax offering a new perspective on many intricate problems arising in a variety of natural languages *Gradience, Gradualness and Grammaticalization* Elizabeth Closs Traugott, Graeme Trousdale, 2010 This volume which emerged from a workshop at the New Reflections on Grammaticalization 4 conference held at KU Leuven in July 2008 contains a collection of papers which investigate the relationship between synchronic gradience and the apparent gradualness of linguistic change largely from the perspective of grammaticalization In addition to versions of the papers presented at the workshop the volume contains specially commissioned contributions some of which offer commentaries on a subset of the other articles The articles address a number of themes central to grammaticalization studies such as the role of reanalysis and analogy in grammaticalization the formal modelling of grammaticalization and the relationship between formal and functional change using data from a range of languages and in some cases from particular electronic corpora The volume will be of specific interest to historical linguists working on grammaticalization and general linguists working on the interface between synchrony and diachrony

Functional Structure from Top to Toe Peter Svenonius, 2014-09-26 This volume consists of nine original chapters on central issues in theoretical syntax all written by distinguished authors who have made major contributions to generative syntax plus an introductory chapter by the editor Dedicated to Tarald Taraldsen the collection reflects the diverse energies that have pushed the cartographic program forward over the last decade The first three papers deal with subject extraction the *que qui* alternation and relative clause formation Luigi Rizzi presents arguments that subjects are criterial and that subject extraction is highly restricted Hilda Koopman and Dominique Sportiche concur suggesting that what appears to be subject extraction in French has been misanalyzed and involves a relative structure Adriana Belletti shows that children avoid using object relatives preferring subject relatives even when it requires passivization The fourth paper by Ian Roberts analyzes the loss of *pro* drop in the history of French and Brazilian Portuguese The papers by M Rita Manzini and Richard S

Kayne both present novel analyses of complementizers suggesting that they are essentially nominal rather than verbal The final three papers address the relationship of morphology to syntax The first two argue for a syntactic approach to word formation Guglielmo Cinque's in a typological context and Anders Holmberg's within an analysis of Finnish focus constructions The final paper by Edwin Williams presents an argument for the limitations of the syntactic approach to word formation

Infinitives at the Syntax-Semantics Interface Lukasz Jedrzejowski, Ulrike Demske, 2017-06-26 The major aim of this volume is to investigate infinitival structures from a diachronic point of view and simultaneously to embed the diachronic findings into the ongoing theoretical discussion on non finite clauses in general All contributions subscribe to a dynamic approach to infinitival clauses by investigating their origin development and loss in miscellaneous patterns and across different languages

Studies on Variation in Portuguese Pilar Barbosa, Maria da Conceição de Paiva, Celeste Rodrigues, 2017-11-15 Studies on Variation in Portuguese offers a collection of studies on a range of variable phenomena attested within and across varieties of Portuguese The volume starts out with an overview of current issues in the study of intralinguistic variation and is divided in two parts Part 1 is dedicated to research on variation within national varieties Brazilian and European Here a multidimensional analysis that combines both the geographic and the social dimensions of variation emerges as a way to identify possible regional specificities and the directionality of some of the variants Part 2 collects studies that compare the behavior of a particular linguistic variable across different varieties The variable phenomena discussed concern several levels of grammar and are framed within different conceptions of variation thus promoting confrontation of theoretical and methodological alternatives Overall the volume constitutes a significant contribution to the essential question of how to model variation at different levels

Argument Licensing and Agreement Claire Halpert, 2016 This book presents a novel account for some unusual properties of Bantu grammar arguing that Zulu has a robust system of syntactic and morphological case This analysis illuminates a number of other properties in Zulu grammar showing that despite surface unfamiliarity its syntax is deeply similar to more familiar languages

The ^AMorphosyntax of Portuguese and Spanish in Latin America Mary A. Kato, Francisco Ordóñez, 2016-10-26 Spanish and Portuguese were Romance languages spoken in the Iberian Peninsula and were brought to America as the languages of the colonizers in the 16th century Along the centuries the two languages developed specific properties that distinguish them from the varieties spoken in the Old World This book offers a rich comparative material which helps us in the understanding of linguistic change and variation

The Linker in the Khoisan Languages Chris Collins, 2019-05-13 The linker introduces links a variety of expressions into the verb phrase including locatives the second object of a double object construction the second object of a causative instruments subject matter arguments and adverbs This volume collects together Chris Collins's published work on the linker in the Khoisan languages Here Collins offers a systematic description of the linker in IHo Ju hoan N uu and to a lesser extent Xo and Xam For each language Collins illustrates various uses of the linker drawing attention to cross linguistic

generalizations as well as to variation between the languages The work presented in this volume should be of interest to researchers working in a wide variety of syntactic frameworks on different languages of the world **The Cartography of Chinese Syntax** Wei-Tien Dylan Tsai, 2015 This edited volume provides new insights into the architecture of Chinese grammar from a comparative perspective using principles of cartography The chapters in this book map out the topography of a variety of constructions in Chinese specifically information structure wh question formation and peripheral functional elements The syntactic structure of Chinese makes it an ideal language for this line of research offering a window into the origin of heavily scrambled constructions often observed in other languages
