Challenges to Democratic Governance in Developing Countries Gedeon Mudacumura,Göktuğ Morçöl,2014-01-04 Despite the large amounts of human and financial resources invested to foster democratic governance in developing countries statistics show that the majority of these countries have not yet achieved significant improvements in living standards While some regions make strides towards improving the living conditions of their citizens Sub Saharan Africa for instance is still trapped in poverty with more than 40% of its 600 million people living below the internationally recognized absolute poverty line of one US dollar per day Poor governance and corruption should be highlighted as the most important systemic factors contributing to poverty in developing countries As a result the institutional foundations of these countries are weakened public funds are misappropriated and policies and programs aimed at reducing poverty and fostering sustainable economic growth are undermined It is therefore not surprising that a 2008 Transparency International report found a direct link between corruption and the failure of the societal institutions designed to achieve the Millennium Development Goals in the majority of developing countries This book investigates the problems of democratic governance particularly as they relate to corruption and also whether democracy should be based on universal principles or local context and historical factors It also analyses the rule of law in promoting democratic governance and curbing corruption and if governmental non governmental organizations and civil societies are effective in promoting democratic governance and curbing corruption This book will go beyond identifying the challenges and offer plausible solutions that could be adapted to various developing countries It is premised on the importance of bridging theory and practice which has been lacking in most local and international development publications making of interest to scholars and policy makers alike concerned with public administration in developing countries

Ethical Theory in the Study of International Politics Mark Evans,2004 This book is designed to introduce readers to a representative range of work which raises what should be regarded as pressing ethical issues in the context of international politics Although by no means comprehensive in coverage of the possible questions that could be appropriately asked the chapters convey a sense of how variegated is the field of ethical inquiry in the global realm Some of the issues are familiar to students of international relations some of them less so What they all show however is that the academic discipline of international relations has much to learn and benefit from how such problems may be addressed using techniques and approaches that have until recently been rather more exclusively restricted to domestic nation statist political theory From the Introduction Contents Introduction Topics in International Political Theory Who Should Pay And How Much for Realising Human Rights World Citizenship and The Ethics of Individual Responsibility World Hunger Moral Theory and Radical Rawlsianism Kids R Us Children as Political Bodies Dealing with the Past Forgiveness and the Reconstruction of Memory in Divided Societies Outsour
