Schechter,2016-07-27 What is meant by the concept of civil society Why do some equate it with liberal democracy while others think it simply a guise for a market economy Who benefits from globalization and who loses out Can civil society prosper in an era of globalization Can global civil society restrain some of the negative consequences of economic globalization Through a series of unique case studies and theoretical inquiries this volume provides a set of concrete answers to questions such as these *The Emergent Global Information Policy Regime* S. Braman,2004-01-20 There is a struggle over governance of the global information network among national governments and international organizations corporations and NGOs elites and civil society The outcome will determine how we communicate the extent of our civil liberties and human rights the profitability of e commerce and the richness of cultural expression This collection looks at the processes by which the global information policy regime is being formed themselves in conflict as a foundation for understanding its emergent features *Understanding World Order and Structural Change* H. Abrahamsson,2015-12-22 Hans Abrahamsson assesses the current world order and structural change within an historical framework He analyzes the interaction of Pax American and the Bretton Woods system in the postwar period and its impact specifically on the development of Southern Africa The author also proposed an analytical model and a methodological framework for the study of the international political economy and its global and local implications Finally he addresses the circumstances behind the current opportunity for global change and the social forces and political action required in order to seize it *Theories of New Regionalism* F. Söderbaum,T. Shaw,2003-11-11 Theories of New Regionalism represents the first systematic attempt to bring together leading theories of new regionalism Major theorists from around the world develop their own distinctive theoretical perspectives spanning new regionalism world order approaches along with regional governance liberal institutionalism neoclassical development regionalism to regional security complex theory RSCT and the region building approach Global Restructuring and the Power of Labour Bill Dunn,2004-05-28 Bill Dunn considers and contests accounts of globalization and post Fordism that see structural economic change in the late Twentieth century as having fundamentally worsened the conditions and weakened the potential of labour Including a comparative survey of restructuring in four major industries automobiles construction microelectronics and finance the book suggests the timing of change and its complex and

World Democratic Federalism M. Frankman, 2004-03-31 Myron J Frankman provides an interrelated set of initiatives whose components are consistent with the logic of both the process of globalization and the emerging properties of our time: Sustainability, democratization, equal opportunity, diversity and peace. He brings together the case for global public finance, a single world currency and a planet-wide citizen's income, all within the context of democratic federalism extending from the local to the global

Valuation of Intangible Assets in Global Operations Farok J. Contractor, 2001-03-30 The valuation of intangible assets has become a central issue in the practice of management. When companies undertake alliances or licensing agreements, effect mergers, sell or purchase brands or evaluate R D projects, a key issue is how each party puts a financial value on the intangible contribution. Valuations also have a tax implication, particularly in transnational operations. The contributors, including academics from five nations and expert practitioners from leading accounting and consulting companies, cover intellectual property, strategy of global firms, valuation of human capital and valuation techniques for the transfer or sale of brands, licenses and other intangible assets. In addition, the contributors address the special needs of the software and pharmaceutical sectors in separate chapters. This book includes tools, metrics and models that are of interest to academics as well as global executives. Recommended for valuation experts, scholars, international tax specialists, executives, especially those involved in alliance negotiations, brand equity, mergers and acquisitions, divestitures and intellectual property management, and officials in such supranational institutions as the EU, OECD, UNCTAD, WTO, IMF and World Bank

Power in Contemporary Politics Henri Goverde, Philip G Cerny, Mark Haugaard, Howard H Lentner, 2000-07-12 This major book provides an up-to-date and state-of-the-art overview of the contemporary theory and practice of the most central concept in political science: power. The concept of political power is introduced within a three-part framework: contemporary theories of power, applications of power, processes and practices, and the implications of modern power flows across the globe today. The book explores the many structures of power in the contemporary world, from theories of its construction and use to its operation in policy networks and its wider exercise at different levels in the political process, from the local to the global. Amongst the many themes explored are the reproduction and the legitimization of power, the dynamics of resistance and coercion, the concepts of private and public power and the impact of globalization, processes and subsequent shifting power arrangements. Combining diverse perspectives and different tools of analysis, this book represents the most comprehensive treatment of political power published in the last fifteen years. It will be essential reading for academics and students alike across political science, international studies and political sociology

The Curious Feminist Cynthia Enloe, 2004-12-15 In this collection of lively essays, Cynthia Enloe makes better sense of globalization and international politics by taking a deep and personal look into the daily realities in a range of women's lives. She proposes a distinctively feminist curiosity that begins with taking women seriously, especially during this

era of unprecedented American influence This means listening carefully digging deep challenging assumptions and welcoming surprises Listening to women in Asian sneaker factories Enloe reveals enables us to bring down to earth the often abstract discussions of the global economy Paying close attention to Iraqi women s organizing efforts under military occupation exposes the false global promises made by officials Enloe also turns the beam of her inquiry inward In a series of four candid interviews and a new set of autobiographical pieces she reflects on the gradual development of her own feminist curiosity Describing her wartime suburban girlhood and her years at Berkeley she maps the everyday obstacles placed on the path to feminist consciousness and suggests how those obstacles can be identified and overcome The Curious Feminist shows how taking women seriously also challenges the common assumption that masculinities are trivial factors in today s international affairs Enloe explores the workings of masculinity inside organizations as diverse as the American military a Serbian militia the UN and Oxfam A feminist curiosity finds all women worth thinking about Enloe claims She suggests that we pay thoughtful attention to women who appear complicit in violence or in the oppression of others or too cozily wrapped up in their relative privilege to inspire praise or compassion Enloe s vitality passion and incisive wit illuminate each essay The Curious Feminist is an original and timely invitation to look at global politics in an entirely different way
