Rethinking Liberal Equality From A Utopian Point Of View:

Rethinking Liberal Equality Andrew Levine, 2019-04-15 For more than a quarter century academic political philosophy has been dominated by strains of liberal theory shaped decisively by John Rawls's seminal investigations of distributive justice and political legitimacy. By intervening sympathetically but critically into several ongoing debates initiated by Rawls's work, Andrew Levine suggests the possibility of a supra-liberal egalitarian political philosophy that incorporates the insights of recent developments in liberal theory while reinvigorating the political vision of the historical Left. Taking current discussions about justice, equality, and political neutrality as his points of departure, Levine suggests the need to rethink mainstream liberal understandings of equality and related notions. The rethinking he proposes lends support ultimately for a vision of ideal social and political arrangements of a kind intimated though only barely sketched in the work of Rousseau and Marx, a vision that not long ago was widely endorsed but that nowadays is almost everywhere regarded as hopelessly utopian. In marked opposition to the reigning consensus view, Levine argues that after compelling liberal concerns are taken into consideration, the vision of ideal social and political arrangements which motivated generations of progressive thinkers and political actors is anything but utopian and remains as timely today as it ever was. This vision, Levine insists, is indispensable for curing contemporary liberalism of its tendency to acquiesce in a status quo that is ultimately at odds with democratic, egalitarian, and even liberal values.

Rethinking equality Chris Armstrong, 2013-07-19 Although formally equal relations between citizens are actually characterised by many and varied forms of inequality, do contemporary theories of equality provide an adequate response to the inequalities that afflict contemporary societies? And what is the connection between theories of equality and the contemporary politics of citizenship? Accessible and comprehensive, *Rethinking equality* provides a clear, critical, and very up-to-date account of the most important contemporary egalitarian theories. Unusually, it also relates these theories to contemporary political practice, assessing them in relation to the impact of neoliberalism on contemporary welfare states and the shift from social to active forms of citizenship. As well as representing a significant intervention within academic debates on equality and citizenship, this book represents essential reading for students of contemporary political theory.

Encyclopedia of Government and Politics Mary Hawkesworth, Maurice Kogan, 2013-11-07 This is a brand new edition of the critically acclaimed *Encyclopedia of Government and Politics* which has been fully revised and updated to provide a systematic account of politics and political studies at the beginning of the new millennium. Providing a penetrating analysis of government and politics at a global, regional, and nation-state level, the *Encyclopedia* assesses both traditional and contemporary approaches and projects the paths of future research. The articles provide a degree of critical analysis far beyond a simple descriptive outline of the subject. Internationally respected contributors have been carefully selected to present contending approaches to related topics, both to clarify the political implications of the various methodologies and to enrich the portrayal of political life. With its expanded, revised, and updated coverage, *Encyclopedia of Government and Politics*

Egalitarianism David Rondel,2018 Pragmatist Egalitarianism argues that a deep impasse plagues philosophical egalitarianism It sets forth a conception of equality rooted in American pragmatist thought specifically William James John Dewey and Richard Rorty that successfully mediates that impasse A Future For Marxism? Andrew Levine,2003-01-20 Not long ago Marxist philosophy flourished Yet in recent years theorists have turned away from Marxism This book looks towards a revival in Marxist theory and shows how it offers a rich foundation for radical socialist thinking in the foreseeable future Andrew Levine examines two recent departures in Marxist thought Althusserian and analytical Marxism He assesses the shortcomings of each while emphasising their considerable merits The discussion is framed against an analysis of socialism s place in the political life of the past two centuries Levine assesses the apparent historical defeat of the Left generally since the consolidation of the Reagan Thatcher era and speculates on current signs of renewal He argues that both Althusserian and analytical Marxism represent important philosophical departures within the Marxist tradition as they force a rethinking of Marxism s scientific and political project For all their differences in style and substance these strains of Marxist thought share important thematic and sociological features and Levine concludes that both traditions provide a legacy upon which a revived Left can build **Contemporary Political Philosophy** Will Kymlicka,2002 This new edition of Will Kymlicka s best

selling critical introduction to contemporary political theory has been fully revised to include many of the most significant developments in Anglo American political philosophy in the last 11 years particularly the new debates on political liberalism deliberative democracy civic republicanism nationalism and cultural pluralism The book now includes two new chapters on citizenship theory and multiculturalism in addition to updated chapters on utilitarianism liberal egalitarianism libertarianism Marxism communitarianism and feminism Extended guides to further reading have been added at the end of each chapter listing the most important books and articles on each school of thought as well as relevant journals and web sites BOOK JACKET

speaking world today evokes extreme responses its defenders present it as the saviour its opponents as the death knell of a fair educational system Disagreement and vagueness about what constitutes social justice in education muddies the debate The author provides a new theory of justice for education arguing that justice requires that all children have a real opportunity to become autonomous persons and that the state use a criterion of educational equality for deploying educational resources Through systematic presentation of empirical evidence the author argues that existing schemes do not fare well against the criterion of social justice yet this need not impugn school choice Brighouse offers a school choice proposal that could implement social justice and explains why other essential educational reforms can be compatible with choice
